

# Care and Cleaning Instructions

## About the Mineral Composite Shell

Mineral composite has a stain-resistant, non-porous surface. With normal use, this surface will retain its appearance with a minimal amount of care.

## When Cleaning

- Remove dust and dry dirt with a soft, damp cloth.
- Apply common household, non-abrasive cleaner in accordance with manufacturer's directions and precautions. (i.e., a mild dishwashing detergent such as Ivory Liquid). Do not use unless the product label specifically states that it is safe for acrylic or plastic.
- Rinse well and dry with a soft, clean cloth. Scouring pads will deteriorate the finish.
- Never use any type of "scrubbing bubbles" or aerosol spray cleaners on your mineral composite product.
- Never use bleach, ammonia or organic solvents, such as lacquer, alcohol, acids or alkalis to come into contact with the product surface.
- Never use abrasive cleansers. If any product feels gritty when rubbed between your fingers, do not use on the mineral composite surface or system controls as permanent damage will occur.

**WARNING:** Check cleaning and bathing product labels. Do not use unless the product label specifically states that it is safe for acrylic or plastic. Some non-abrasive products damage the surface over time.

## General Care

- Do not allow the mineral composite surface to come into contact with nail polish, nail polish remover, Wintergreen oil, dry cleaning solution, lacquer thinners, gasoline, pine oil, etc.
- Avoid using razor blades or other sharp objects that might scratch the surface.
- MTI strongly recommends a professional surface repair person for deep scratches, chips or gouges.
- Damage occurring to the unit during installation is the responsibility of the installer, and after installation, the responsibility of the user.
