GAZING GLOBE STAND

Each stand is cast and painted. Imperfections from the casting process and slight color variations from the painting process are normal. Pitting on the surface of the stand are caused by air bubbles becoming trapped when the casting material is poured into the mould. Over time, the finish will gradually mellow in color; this is part of the natural aging process.

LOCATION

Select a flat, level surface to place the stand. Avoid high-traffic locations, such as areas where children or pets play.

CLEANING

Clean your unit often to prevent dirt and debris from building up.

1. Remove loose dirt, cobwebs, and debris with a very soft-bristled brush, like a paintbrush.
2. Gently rinse the stand using water and allow it to air-dry.

If you experience issues with the product or it was damaged during transit, please contact our customer service team through one of the methods mentioned at the top of page 1. Please have the item number and order information ready to expedite response time.
