

BEFORE USING YOUR WAYFAIR PRODUCT

Upon arrival, please leave the unit upright and wait 24 hours before plugging it in.

Why is this important?

This will give the coolant time to settle after shipment. If it is plugged in too soon, the unit will not reach a cold temperature.

We hope we have answered any questions you have about the installation of your new product. If you have any additional concerns, please call Wayfair Customer Care at 844-417-5480. We're happy to help!
