getting started

In-Depth Uses

- 1 * Deshedding Brush can remove loose hair for longer and shorter coats. It quickly reduces shedding by up to 95%
- * Use only once a week or two to avoid irritation and injury to your pet.
 - * Use as needed and DO NOT brush hard.

- 2 * Slicker Brush can clean the loose, floating hair and any debris in the hair. Get rid of tangles and other small knots. Use daily for a nice soft coat.

- 3 * Electric Clippers comes with a suction area that captures hair that has been cut to avoid making a mess on the floor.
- * 4 different clipping combs can be used for different demands of hair style. 3mm, 6mm, 9mm, and 12mm (Only for trimming hair).
 - * DO NOT attempt to cut hair without knowing your pets needs!!! Keep reach out of children.

- 4 * Crevice and Brush tool can be used for cleaning crevices like keyboards and floor edges. The brush for surfaces with dust

- 5 * Clipping Comb can be used for different demands of hair styles. The combs are detachable, please store them properly to avoid misplacing them.

- 6 * Hair Remover is used to clean pet hair on the surface of clothes, sofas and other fabrics. Avoid using it on pets directly.

- 7 * Keep an eye on the hose and dust container to make sure the vacuum is working properly. Clean and remove hair as needed.

care and maintenance

Clean the Dust Container

Place the Dust Container over the dustbin. Release the latch that is holding the bottom of the container to dispose collected hair and dirt.

Electric clipper blade care

Remove the metal clippers and the cover, clean any debris on the blade and inside the attachment. Use provided brush to clean in the smaller areas.

Cleaning the sponge filter

Remove the dust container and take out the foam filter. Wash with water and drain the water after cleaning. Let it set in a well-ventilated place for at least 24 hours and place it back under the dust container. Replace when needed.

Filter(HEPA) Clean

Remove the dust container and lift up the HEPA filter. Wash with water. Do not scrub, it will damage the Hepa. Drain the water as much as possible without squeezing. Once dry, place back into the vacuum with the honeycomb design facing up

The sponge filter should be cleaned with cold water at least every other month.

Storage

The hose can attach to the side of the vacuum using the notches to hold it in place.

For easier use, there is another attachment to place the hose and other attachments would fit. Use the notches to clip the holder in place and have any attachment placed for quick use.

Strap Fasteners to hold the cable tied.
