Assembly Guide: Zealfeel 12ft Volleyball Net FULL Training Set

Model: VN-T-12A-S-V2

This is the "Full Set" edition, which includes everything you need for a complete scrimmage right out of the box. With the **12ft width**, this system is the ultimate choice for high-intensity 1-on-1 or 2-on-2 training drills in smaller spaces.

Package Contents

Please check your bag for the full list of included accessories:

- **1 x** 12ft 3-Ply Durafiber Volleyball Net
- **1 x** Set of Poletech Fiberglass Poles (16MM/19MM)
- **1 x** Arched Base Frame (Metal)
- **1 x** Volleyball (Official Size)
- **1 x** Ball Pump
- **1 x** Scoreboard
- **4 x** Ground Stakes
- **1 x** Storage Backpack/Carry Bag

Assembly Instructions

Step 1: Set Up the Base & Accessories

Assemble the metal base tubes on a level surface. While you have the parts out, use the included **Ball Pump** to inflate the volleyball.

Note: Moistening the pump needle before insertion helps protect the ball's valve.

Step 2: Install the Vertical Poles

Connect the fiberglass segments. Insert the bottom of each pole into the receptors on the ends of the metal base. Patented **Poletech** technology is designed to absorb the energy of your hardest spikes without warping.

Step 3: Slide on the Net

Unroll the 12ft net. Slide the side sleeves over the top of the poles. Because this is a practice-specific net, the tension is calibrated to mimic a professional court feel.

Step 4: Choose Your Height

Using the slider mechanism, adjust the net to the appropriate height:

- **Men's Standard:** 8 ft
- **Women's Standard:** 7.4 ft

Step 5: Secure & Score

- **Staking:** If playing on grass or sand, use the **4 Ground Stakes** to anchor the base.
- **Scoreboard:** Set up the scoreboard near the sidelines. You're now ready for a competitive match!

Why the "Full Set" (S-V2) is Different

Unlike the standalone net systems, the **S-V2** is a "ready-to-play" kit. It's specifically designed for coaches and athletes who need a portable training station that doesn't require any additional equipment.

- **Durafiber Net:** Features a 1.75" tear-resistant mesh that holds up against 20,000+ hours of UV exposure.
- **Arched Structure:** The curved base provides superior stability on driveways and gym floors where stakes can't be used.

Storage Tip

When you're finished, deflate the ball slightly if you're traveling to high-altitude areas, and ensure the net is dry before folding it into the backpack to maintain the 3-ply material's integrity.
