

Thank you for purchasing the Smart RGB CCT Bulb. This manual will guide you through the setup and operation of the product. Please read the instructions carefully before using the bulb.

## Downloading the APP

- In your app store, search for “Smart Life” from Apple Store (for IOS) or Google Play (Android) and register with your mobile number, email address or your social media account e.g. Facebook.
- Scan the QR code from the label or instruction manual.

## App Connection.

- Please ensure that your device's Bluetooth is activated before following the steps below.
- Before connecting your Smart Bulb, please open the Smart Life app and create an account if you haven't done so already.

### Wifi

- Open the Smart Life app, select “add device” and press “lighting”. On the next interface, choose “lighting” on the list on the left-hand side. Power on your Smart Bulb and the bulb will flash rapidly. If the bulb isn't flashing, please follow the next step.
- Reset: Power off your Smart Bulb for ten seconds and then power on and off three times. Your Smart Bulb will now flash rapidly. Press “Next” to confirm that the Smart Bulb is flashing rapidly. On the next interface, enter your Wi-Fi and password to connect with the lights.

### Wifi+BLE

- Power on your Smart Bulb and open the Smart Life app. Please make sure that your Bluetooth is switched on. The Smart Bulb will now be flashing rapidly. Press “add device” and on the next interface, choose “lighting” on the list on the left-hand side. Go to “devices” and enter your Wi-Fi and password to connect the lights.

### Bluetooth

- Make sure that your Smart Bulb is in factory mode. Power on your Smart Bulb. If it flickers five times and turns white, this means your Smart Bulb is in factory mode. You can now connect your Smart Bulb with your device. If this is not working, you will need to reset your Smart Bulb.
- Power off your Smart Bulb for 10 seconds, then turn on/off three times. Your Smart Bulb will now flicker several times and the reset has been successful. Please follow the next step.
- Power on your Smart Bulb and open the Smart Life app and click on “add device”. On the next interface, select “lighting” on the left-hand side of the screen and choose and press the bulb that suits your Smart Bulb. Switch off your Smart Bulb and after 10 seconds switch on and off three times. Your light will now be flashing rapidly. Press confirm and next. Your device will now begin to connect to your Smart Bulb.

### **Setting Bulbs Controlled by Alexa/Google Home.**

- Open the Smart Life app. On the My Home screen/All Devices press on the Bulb that image. The next interface with the bulb control page. Go into settings, top right hand corner (three dots). This will open the bulb information page. You will see the “supported third party control” Depending on your device, select one of Google Play or Alexa. From here follow the instructions shown on your mobile/tablet with Alexa or Google Home.

### **Using Two Devices to Operate the Bulb.**

- Go to the Smart Life app opening page and select settings (top right hand corner). You will see four options, click on “share device” a new page will open with the heading “add sharing”. Add the device name you want to share the operating of the bulb with. Now go to operating page and you will see the other account you have just shared. Click on the device you want to share and you are good to go.

## **Warning**

- Only to be used indoors
- Do not expose to flammable sources, liquids or gases.
- Do not open or modify the item as this will revoke your warranty and may cause harm.
- Only use with voltage between 110-240v (50/60Hz).
- The bulb is not suitable to use with dimmers
- Do not switch on and off the bulb in short intervals as this will reduce the life of the bulb.
- If the bulb is damaged, disconnect it from the power source and have a qualified electrician inspect the bulb before operating again.
