

# MT40 16" x 16" Mesh Tray

## Available Packs:

Single Tray

Pack of 10

Pack of 16

## Model: MT40

### Product specification

- Commercial Use
- Stainless Steel
- Dishwasher Safe

<b>Tray Dimensions</b>	16" x 16"	<b>Tray Weight</b>	0.95 lbs/tray
<b>Tray Mesh Spacing</b>	5/16" x 5/16"	<b>Available Packs</b>	Pack of 1 Pack of 10 Pack of 16
<b>Total Tray Area</b>	2 sq. ft/tray	<b>Tray Material</b>	304 Commercial Food-Grade Stainless Steel

## Cleaning Guide

It is important that your commercial food dehydrator and dehydrator trays are cleaned at the end of each drying session. This is done for many reasons:

- To ensure your food dehydrator and trays are kept in pristine condition
- To avoid cross-contamination of food
- To ensure the quality of your product is maintained
- To prevent food residue from building up and hardening on the trays

1. Clean the dehydrator and trays after each use. Ensure the machine has been turned off and the cool-down period has been completed.
2. Remove the racks from the dehydrator cabinet before cleaning.
3. Clean the dehydrator racks with warm, soapy water; rinse with clean water and dry immediately.

Racks are dishwasher-safe.
