

CARE INSTRUCTIONS FOR MIRRORS

1. Make a mixture of equal parts water and white vinegar
2. Spray mixture directly on micro fiber cloth
3. Gently wipe mirror with micro fiber cloth

*Although our finish is extremely durable the mirror can be damaged by harsh abrasives or chemicals.

WHAT DOESN'T WORK & LEAVES STREAKS?

- Wiping your steamed up mirrors with a towel post-shower
- Using newspaper; this may have been true years ago, but today's ink will leave behind residue
- Paper towels leave behind small piece of residue, making your mirror look dusty
- Using a general cleaning product that is not labeled specifically as a window cleaner
