

We Make Your Pet Happy!

# 3 Piece Dog Relief System

**Pad Measures:  
20" x 25"**

**Perfect for Use  
Indoors & Outdoors**

**80-ST2025**

- Ideal for housebreaking your dog
- Non-toxic / safe to use around your pet
- Portable, easy to clean, wash with soapy water

**Keep your pet comfortable and your floors and carpets clean.**

- 3 layers: synthetic grass mat, elevated grid tray and base collection tray
- Perfect for use indoors, porches & patios

**How it Works:** The Base Tray holds the Grid Tray with the Grass Mat placed on top. When your dog goes to the bathroom, the urine goes through the Grass Mat and through the holes in the Grid Tray to the bottom of the Base Tray. The pegs on the surface of the Grid Tray and the raised platform of the Base Tray elevate the Grass Mat keeping it away from the urine.

### Grass Mat

Non-toxic synthetic grass. Looks and feels real.

### Grid Tray

Drains, elevates grass mat, keeping it away from urine.

### Base Tray

Collects urine, keeps mat dry.

# Dog Potty Trainer

Congratulations on your purchase of the unique Dog Potty Trainer. The Dog Potty Trainer will assist you in training puppies as well as allowing your older dogs to go to the bathroom when it is not possible to take them outside. The nontoxic Dog Potty Trainer is safe and very effective and will last many years with proper care.

### Helpful Hints:

- Keep Dog Potty Trainer in the same location.
- Dog Potty Trainer can be used without the synthetic grass. Place grate into tray with spikes facing down. This works well for puppy training.
- When training, use positive reinforcement while dog is on the grass
- Check tray contents regularly. Tray will hold up to one gallon..
- Keep Dog Potty Trainer clean and clear of debris.
- Clean your Dog Potty Trainer as needed.
- Grass patch is cut from a large roll and may fray at the edges. This is normal and will eventually stop as it slightly recedes from the edge.

### Contents:

1 tray, 1 grate, 1 grass mat

### Assembly Instructions:

1. Place tray in the desired location.
2. Place grate in tray, spikes facing up. (To use without grass, place grate with spikes facing down).
3. Place synthetic grass on top.
4. Your Dog Potty Trainer is ready to use.

### Frequently Asked Questions

#### How does my Dog Potty Trainer Work?

The grass sits on top of the grate that is inserted in the holding tray. When your dog urinates, the urine seeps through the specialty woven grass, through the grate and into the tray. The grate elevates the grass from the bottom of the tray keeping it high and dry from the liquid.

#### Can I use disposable pads with my Dog Potty Trainer?

Yes, disposable pads make it easier to remove the liquid from the tray. Place the pad on the bottom of the tray and the grate over the top of the pad. Dispose the used pads in the appropriate waste container. Do not dispose pads in the toilet.

#### If I have Dog Potty Trainer, does that mean I do not have to take my dog outside anymore?

No. Dog Potty Trainer is not a substitute for exercise or regular walks. It is important for all dogs to exercise for their health.

#### My dog is not always attracted to the Dog Potty Trainer. What can I do?

You can treat the grass with a pheromone spray. It will attract your pet to the grass. Pheromone spray is usually available at pet stores.

NOTE: DUE TO THE NATURE OF THE DOG POTTY TRAINER, IT IS EXTREMELY IMPORTANT TO KEEP ALL CHILDREN AWAY FROM THE DOG POTTY TRAINER.
