Installation Step 01

● Inspect the level of your bathtub and wall before installation.

Installation Step 02

- Insert the side strip part 4 to the inside gap between bracket and panel tightly.

Installation Step 03

- Min. distance 8" to the wall for part 10

Installation Step 04

Put the wedges part 16 to support and keep panel part 8 1-2mm higher than panel part 7 to avoid sagging of gravity after the installation.

● Keep the gap about 7-8mm between two glass panels.

● Ensure the hinges are oriented appropriately, tighten them to prevent the panel from sagging

Installation Step 05

- Ensure the side and bottom strips are oriented appropriately to prevent water leakage.

Installation Step 06

Do not use the shower enclosure for at least 24 hours in order to ENSURE the silicone sealant to cure fully.

Shower Door Maintenance And Care

1、 Shower door glass is double-sided easy-clean glass. Using moist soft cloth to wipe away surface water or stains For daily cleaning , reduce to use the cleaning agents to extend the easy-clean performance. Recommend to use soft cloth to clean the residual water stains on the glass and hardware after shower. Silicone squeegee is available.

2、 Do not use any sharp cleaning tools or cleaning agents with abrasive ingredients to clean the glass.

3、 Caustic cleaners should not be used, such as alcohol. Long-term use of corrosive cleaners will cause discoloration of the hardware.Reducing the use of cleaners will prolong the use of the hardware&glass appearance. You can use small amount of anhydrous ethanol or detergent to clean stubborn water stains or calculus on the hardware.
