TWIN/FULL/QUEEN ASSEMBLY

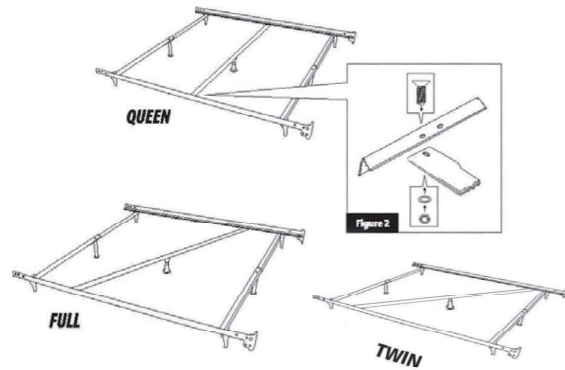

Step 1 Swing out cross arms to 90 degrees.

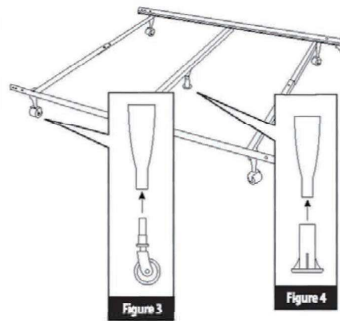

Step 2 Place rivets of the cross arms into appropriate key holes then slide to lock as shown in Figure 1.

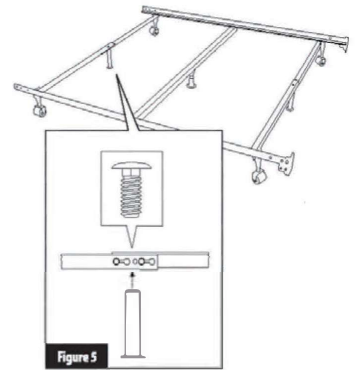

Step 3 Attach center support with bolt (2), nut (4) and washer (3) as shown in Figure 2 (Side-to-side for queen size and diagonally for full size and twin size). Use tool 5&6

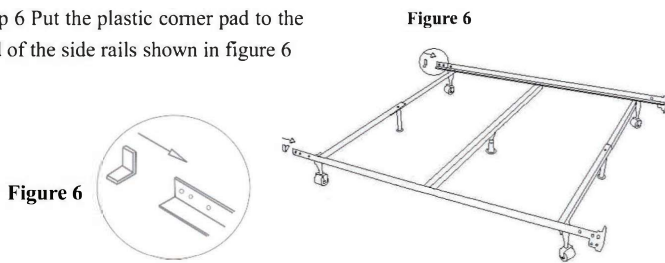

Step 4 Install wheels and glide as shown in Figures 3 and 4.

Step 5 Place support legs under holes that align on center of cross arms. Screw in as shown in Figure 5. Use bolts NO1

Step 6 Put the plastic corner pad to the end of the side rails shown in figure 6

Finish

Important Warnings:

Always use the center legs to
Increase the weight capacity
for the whole set, when moving
the bed, please make sure the center
support legs are not bent by the flooring
