⑰

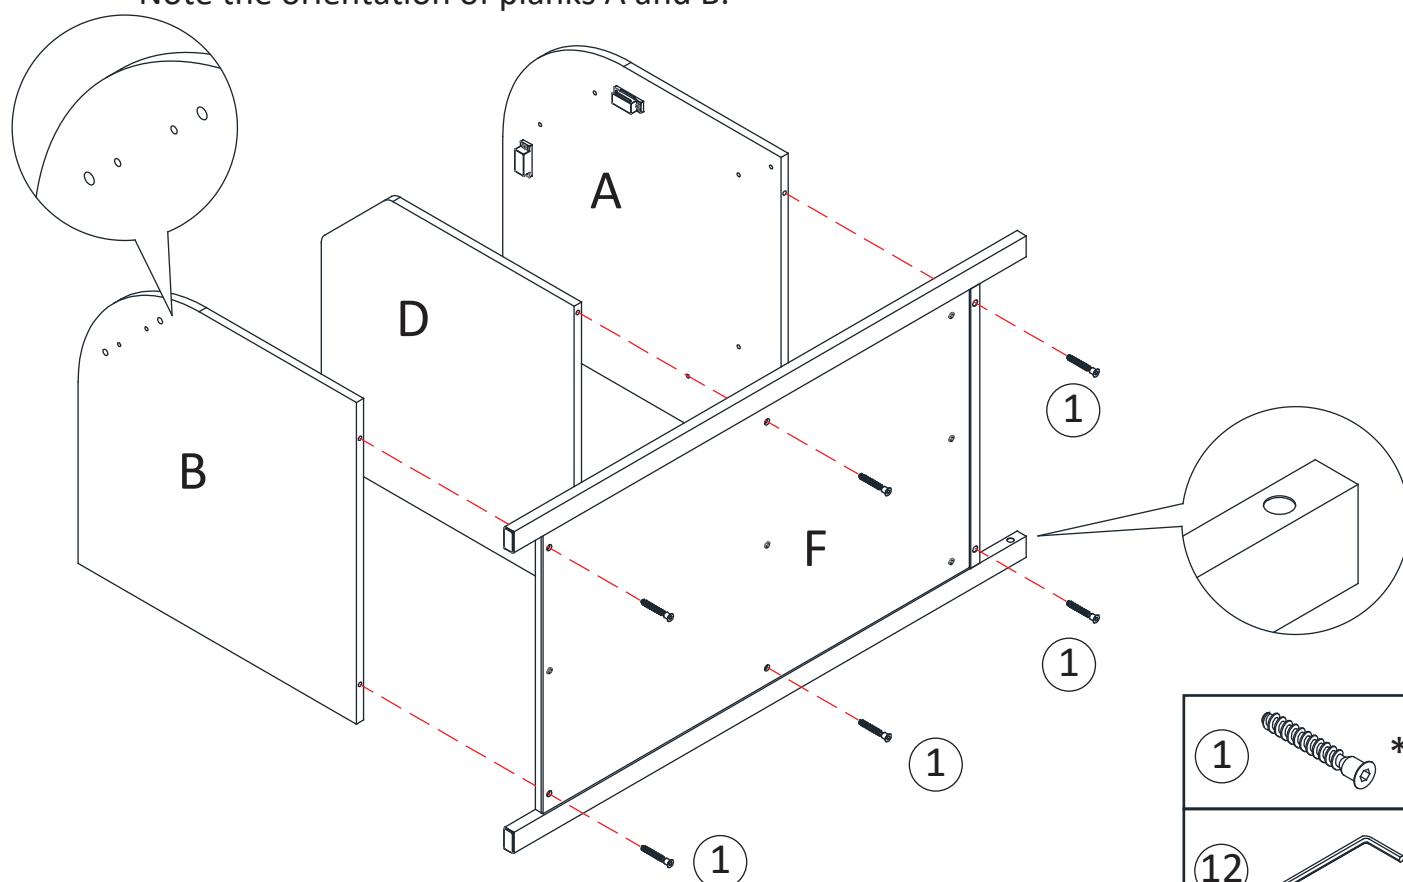

1. When assembling the ⑦ and ⑧ parts, pay attention to their orientation.

②		*2
④		*4
⑫		

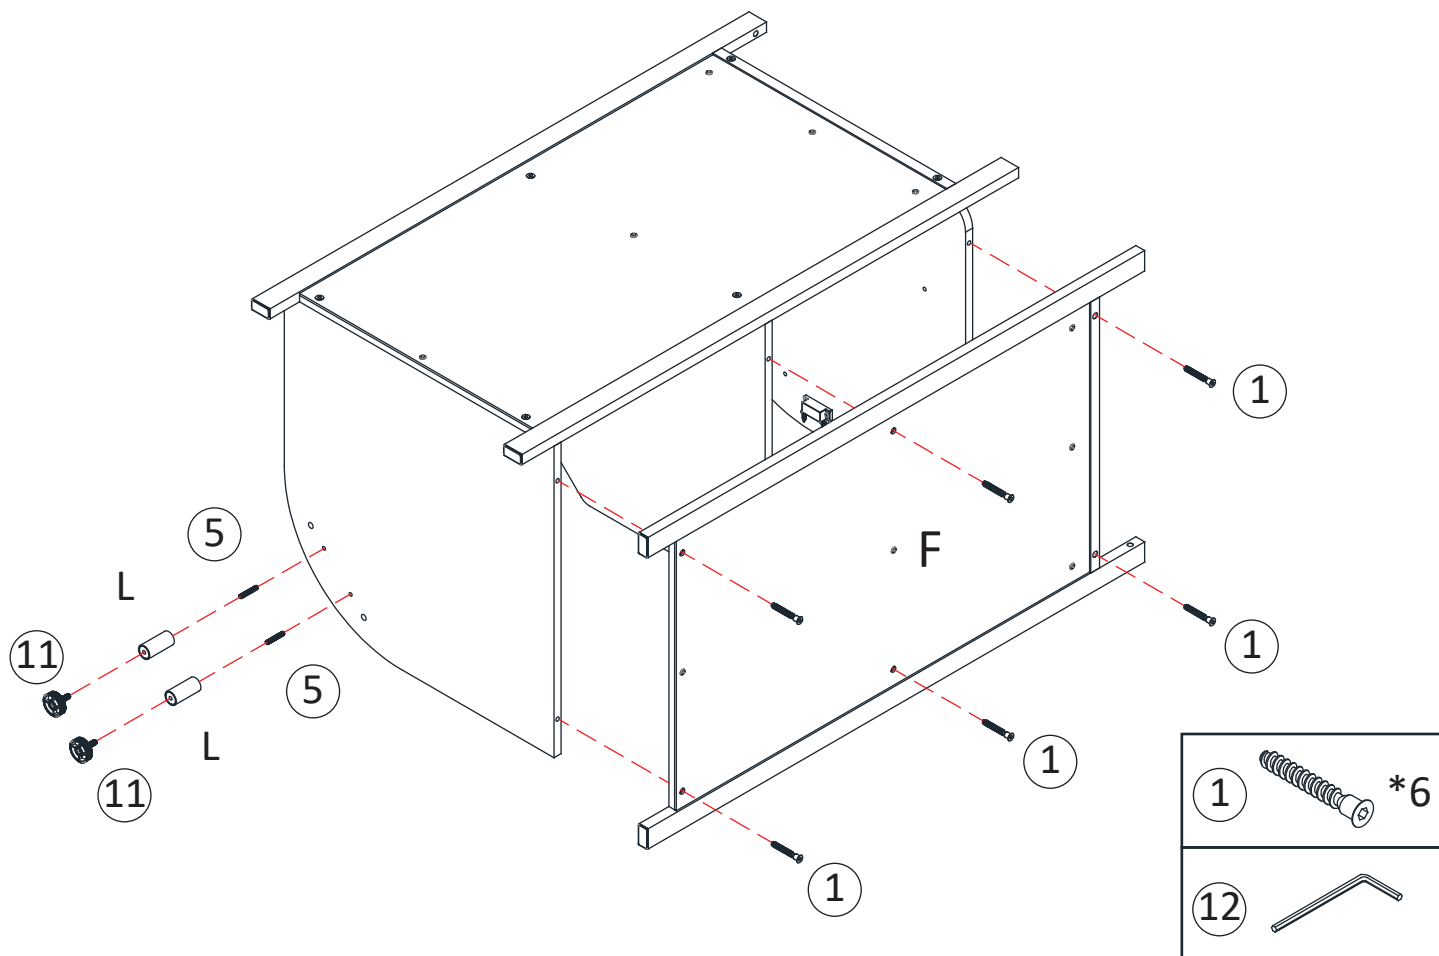

2. When assembling, pay attention to the up and down direction of the holes of the two boards(board A&B).

Note the orientation of planks A and B.

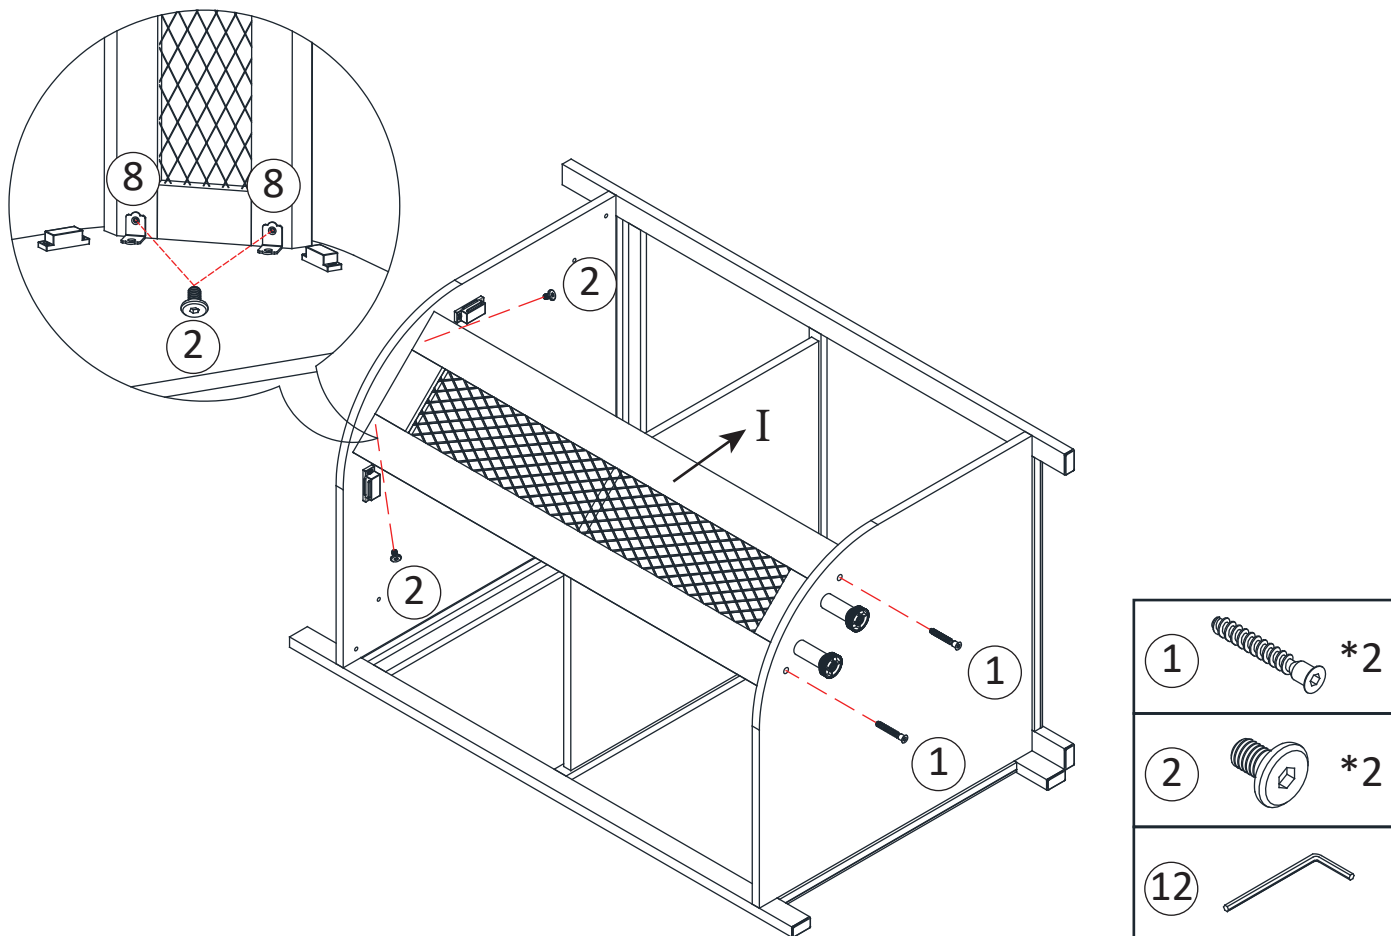

①		*6
⑫		

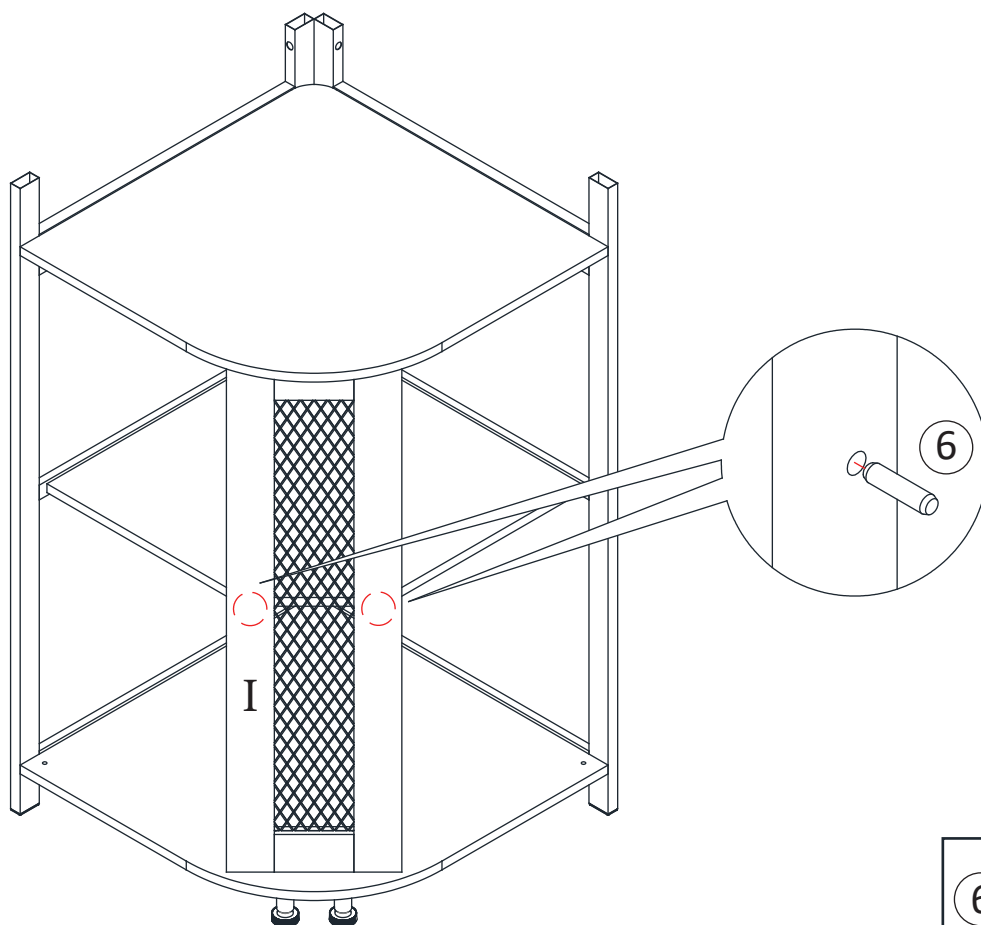

3. Install another board F, and adjustable-foot ⑪.

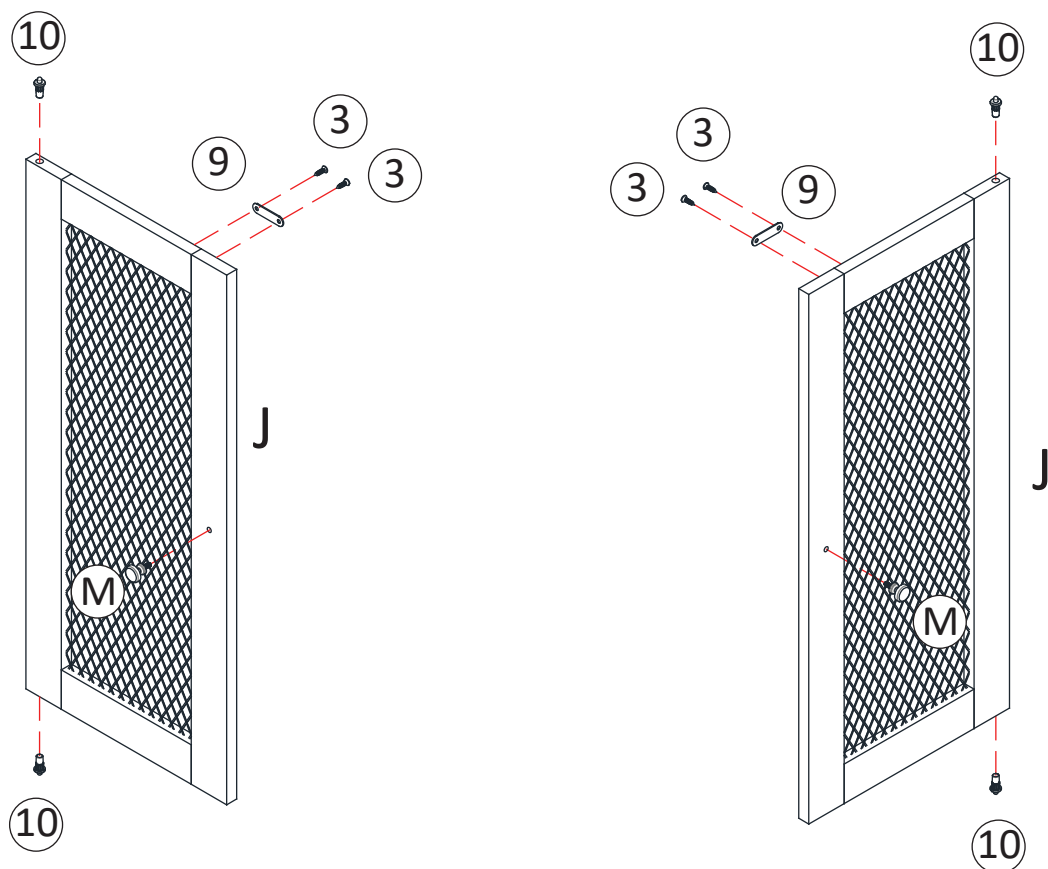

4. When assembling part-I with ①&② screws, align the reserved holes.

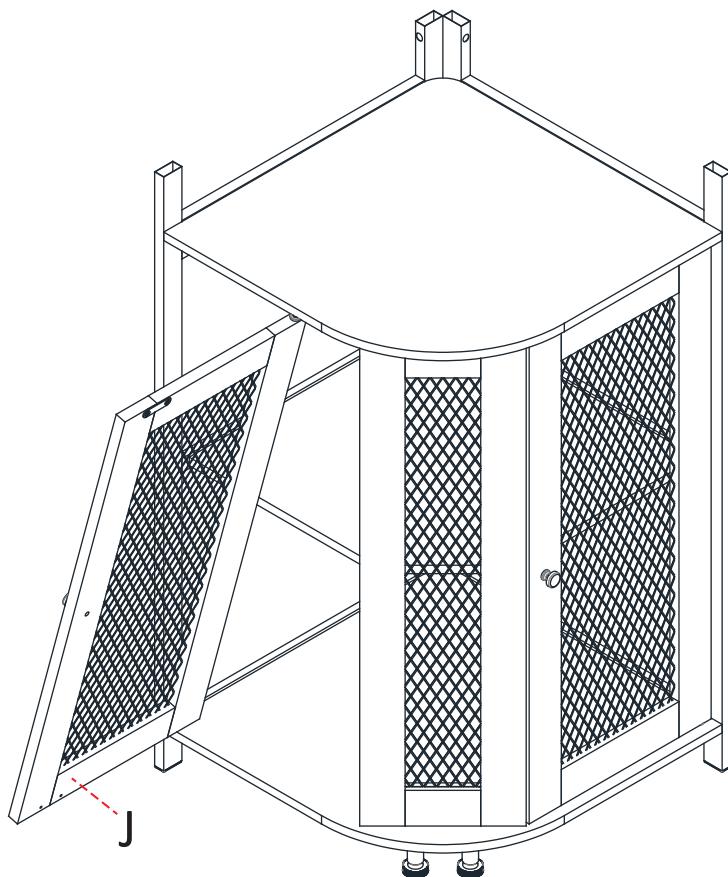

5. Insert part-⑥ into the holes on the inside of the board I.

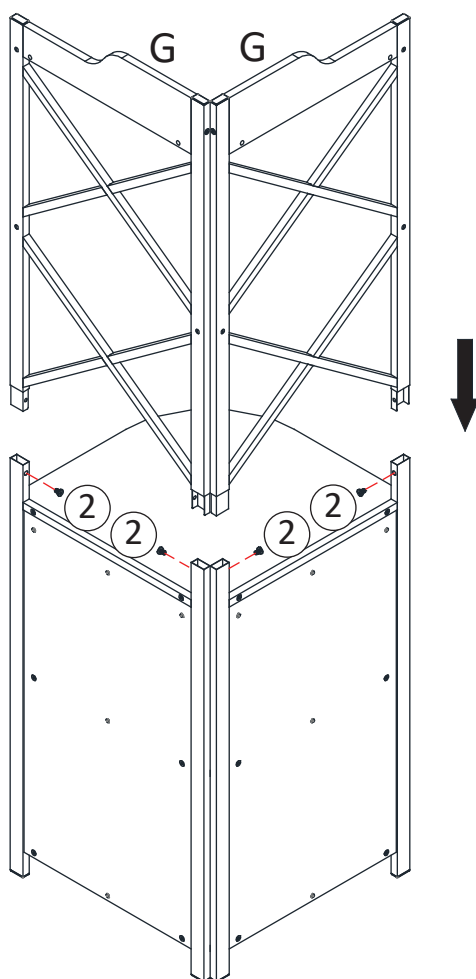

6. Operate as shown. Note part-⑨ in the direction of the two doors.

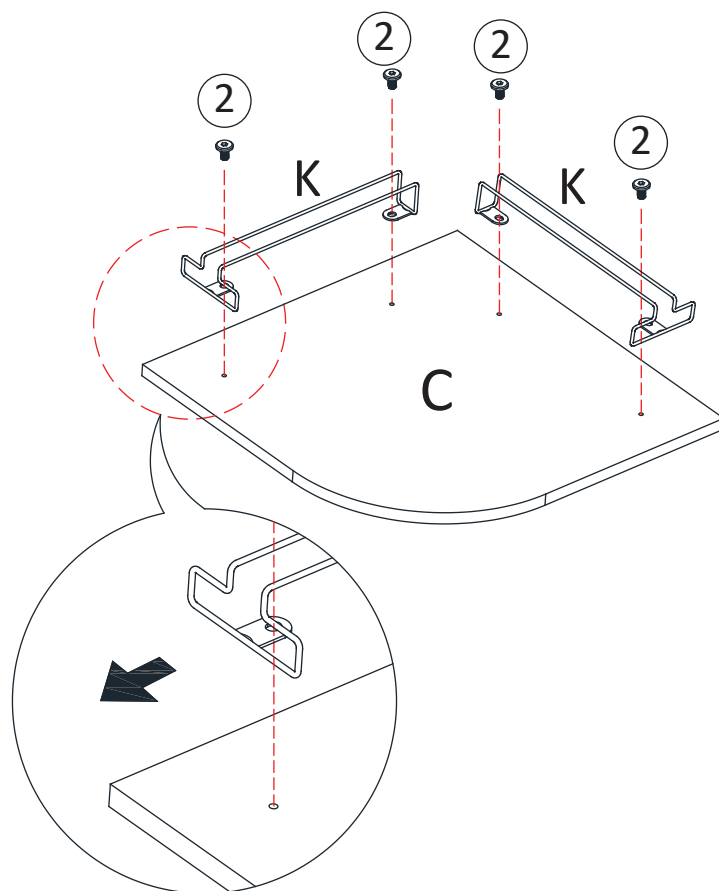

7. Insert the bottom latch of the door panel (part-J) into the reserved hole on the bottom plate first, and then insert the top latch of the door panel into the reserved hole under the panel in an inclined manner.

8. As shown in the figure, fix Part-G into the cabinet with ② screws.

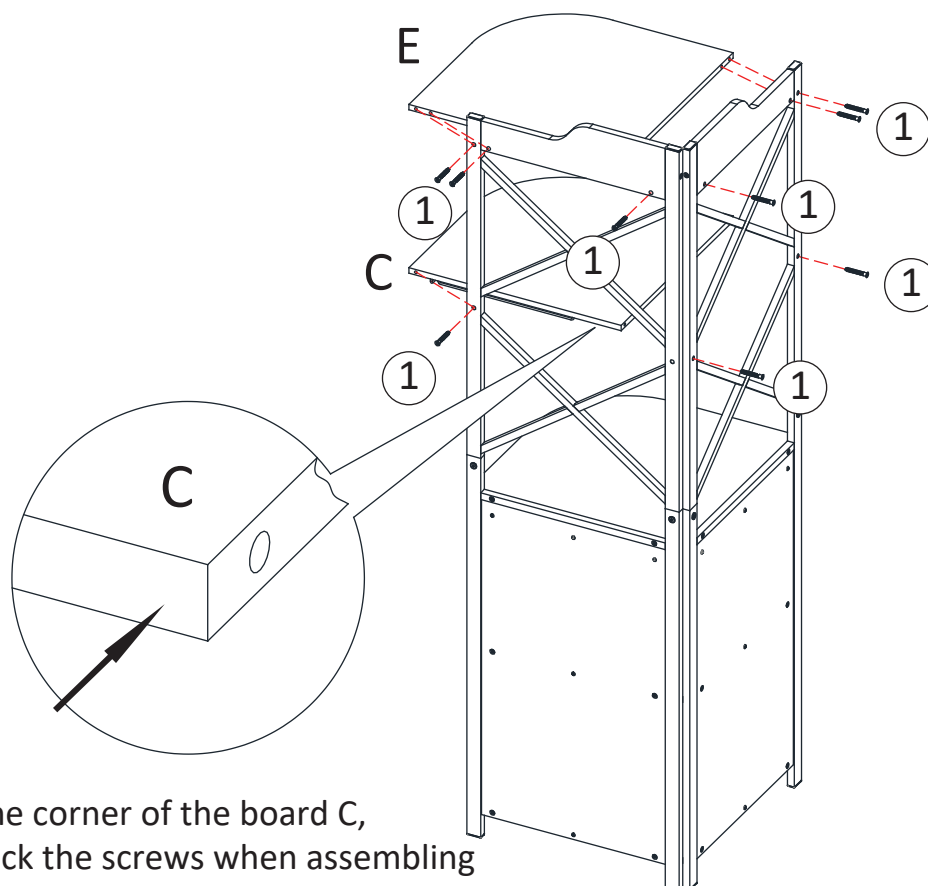

9. When assembling part K, the large side of the wire opening must face the curved edge of the board.

2  *4

12 

10. Fix the board C&E with screw (1).

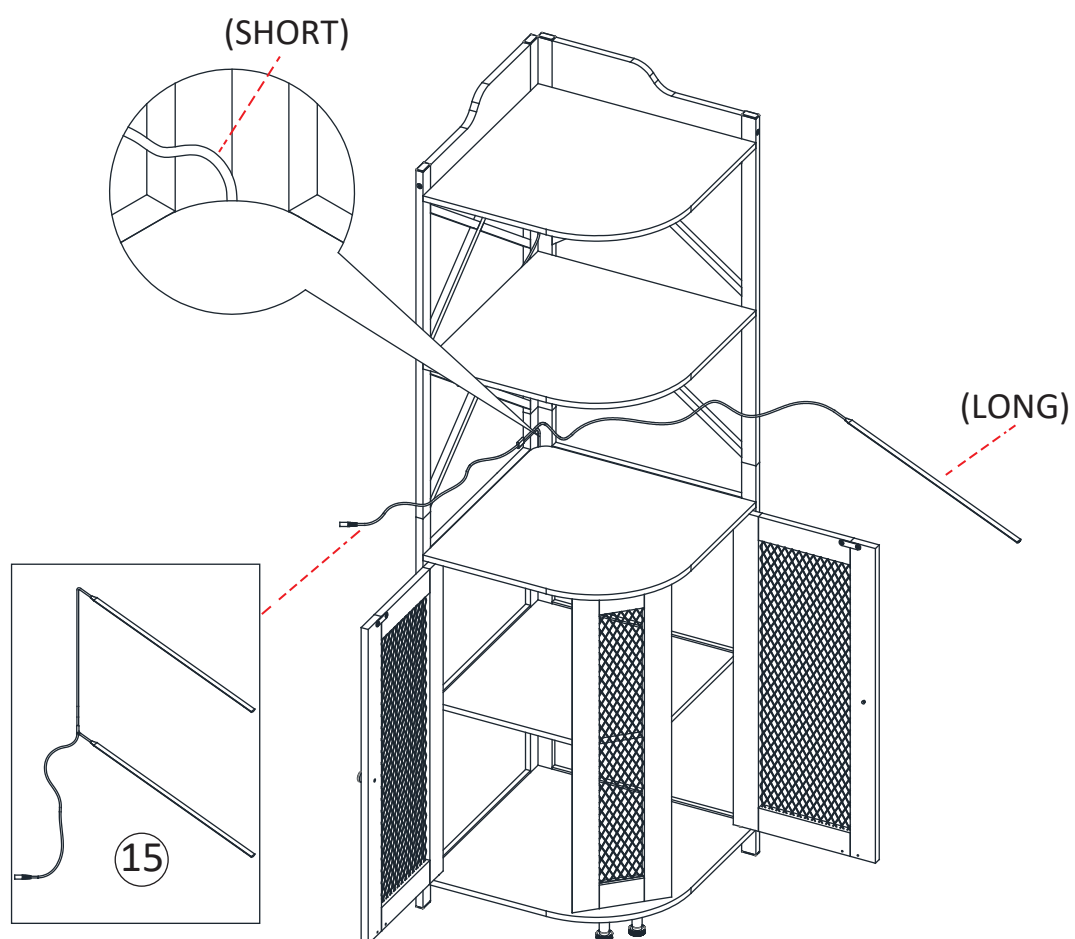

*No hole in the corner of the board C,
no need to lock the screws when assembling

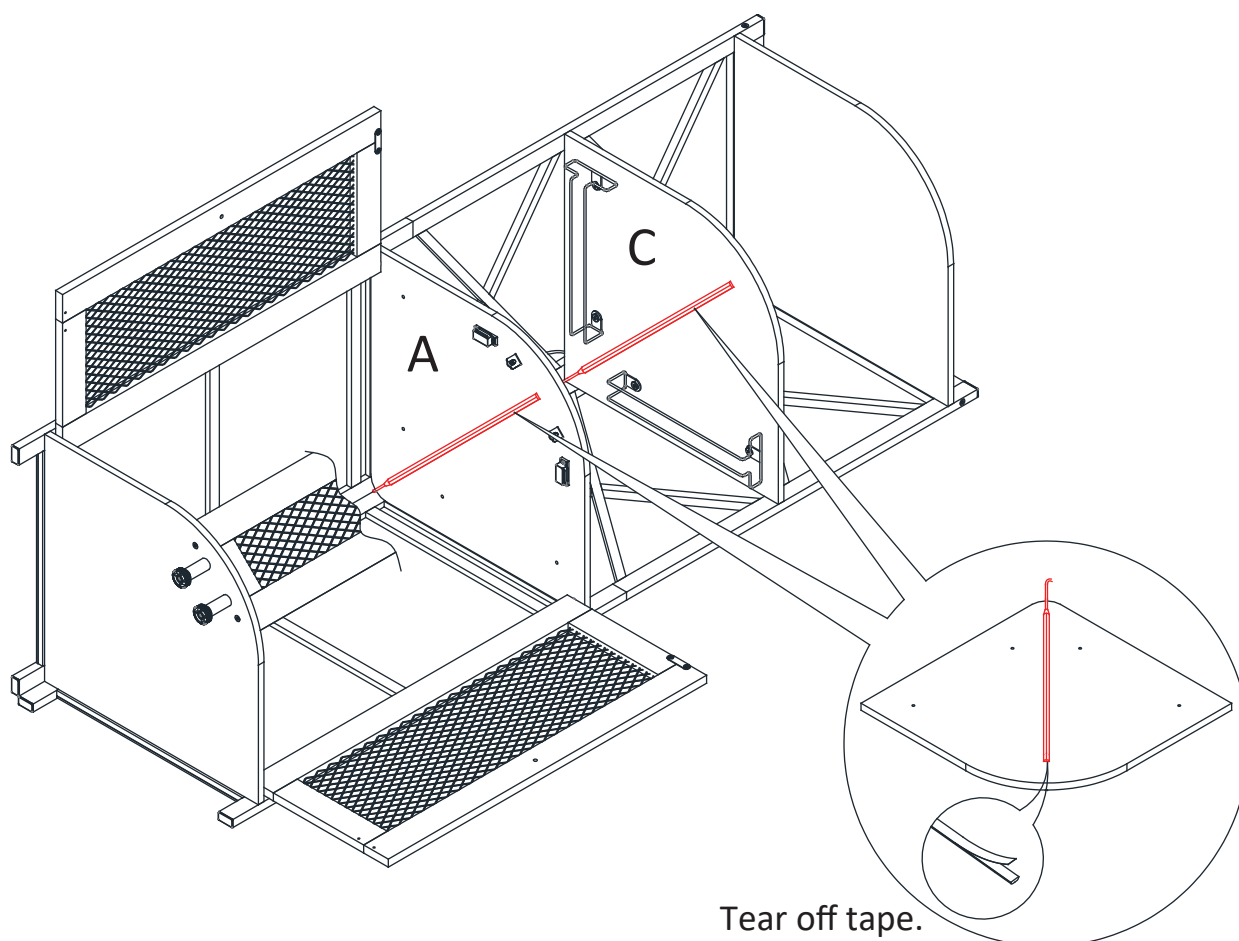

1  *9

12 

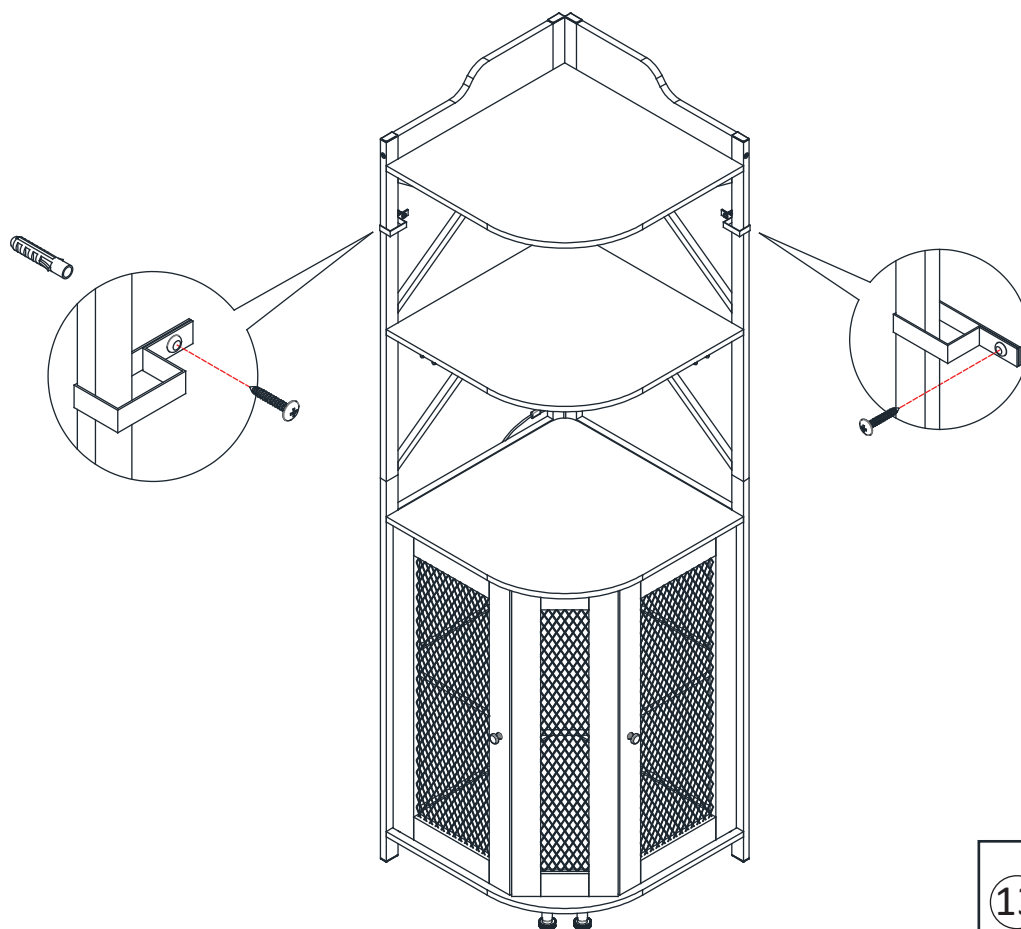

11. Short-light strip runs through the holes between the board.

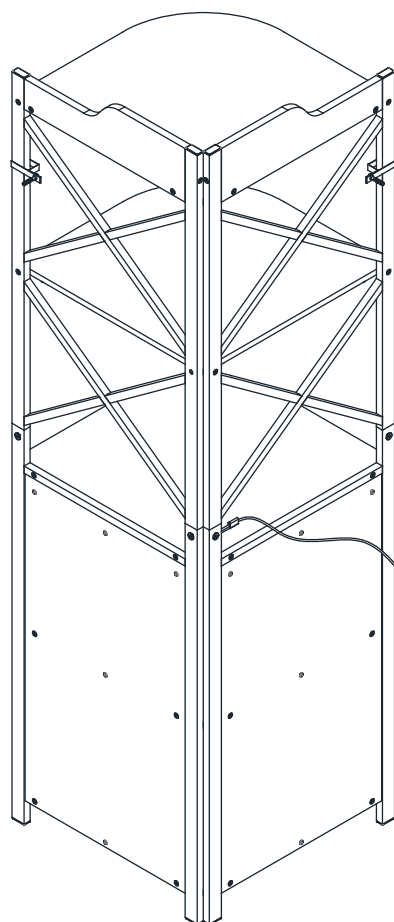

12. Tape the light tape to the center of the boards.

13. Fix the anti-tipping device (13) on the shelf.

14. Connect the power cord (16) to the light strip (15) and turn on the power;
Control lights by remote-control-(17).

Pull off the protective plastic sheet at the remote control battery.
