<p>Move the door in and out</p>	 <p>If the door doesn't meet the box at the top, adjust the top hinge toward the cabinet and/or adjust the bottom hinge away from the cabinet. If the door is gapped at the bottom, do the reverse.</p>
<p>Move the door right or left</p>	 <p>You can adjust one or both hinges on each door, depending on how much correction it needs. If the door seems to be tilting down to the right, turn the side-to-side screw on the top hinge so the hinge pulls closer to the side of the cabinet box, moving the top of the door to the left.</p>
