Points to note:

1. Please read the Assembly drawing carefully before installing, using and repairing the luminaire. Please keep it safe after use for future use.
2. Do not use power supply beyond the specified range (rated voltage AC110V \pm 10% frequency 50HZ) for a long time above the rated voltage range, may cause overheat lamp damage.
3. Make sure the cable and switch are in good condition and the local voltage is consistent with the lamp voltage.
4. Please turn off the power before installing or repairing the lamp.
5. Please do not install luminaires over high temperature objects, such as stove, gas, exhaust, etc. .
6. Please do not modify the lamps or lanterns without permission in case of malfunction.
7. When the lamp is not bright after the power is switched on, please check whether the circuit is in good condition and whether it is in bad contact.
8. Please clean and check regularly and turn off the power before cleaning. Wipe the surface with a soft dry cloth, do not use acid or alkaline chemical solvents, or it will cause serious damage to the surface.
