please send an E-mail with your order No. & issues to our customer service, we will respond within 24 hours, Customer Service Team: support@idealhouse.vip

Warning: Please read!

1. The mirror should be installed by a professional installer.
2. It is recommended to have at least two people available to install the mirror. All mirror glass is Explosion-proof glass, but it is better to wear proper protective gear during installation in case to be hurt by sharp shards if the glass suddenly shatters.
3. Using the included proper anchor and screws for securing the unit to the wall is crucial. Screwing to the stud is recommended.

Installation Instruction

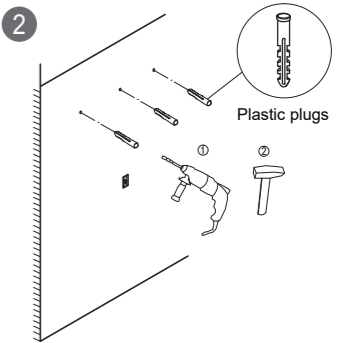

Please decide to hang your mirror in vertical or horizontal, it is better to have one more person help you install the mirror together.

1

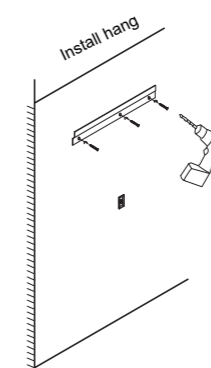

Step 1: Take out the hanging strips that come with the packaging, choose a suitable height on the installation wall, and use a level to do a parallel test to ensure that the screw holes at both ends of the hanging strips are positioned parallel, and mark the holes on the wall with a pencil.

2

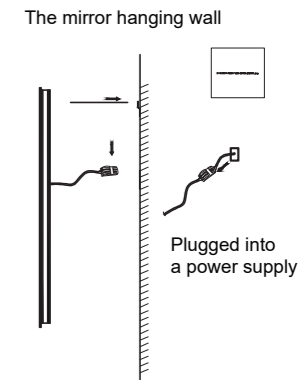

Step 2: Use an electric drill to drill a hole at the marked position, and hammer the expansion tube into the hole.

3

Step 3: Align the hole on the hanging bar with the expansion tube, and screw the screw into the expansion tube with a hand electric drill to fix the hanging bar.

4

Step 4: It must be operated by a professional licensed electrician.

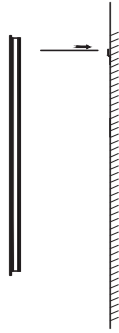

you can directly use the plug that comes with the mirror to connect to the wall socket

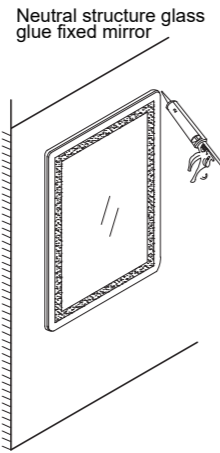

or cut the plug and use the inner core wire to connect, the green is connected to the ground wire, the white is connected to the neutral wire, and the black is connected to the fire wire. The insulated terminal wraps the wire ends; then turn on the power and debug.

5

Step 5: Hang the LED mirror to the hang strips, confirm it hangs well.

6

Step 6: Use neutral glass glue to reinforce the lower edge of the back frame.

Functional test

Short press to turn on/off defogger, automatic shut down after 60 minutes.

Short press to turn on/off LED strip, long press for dimming brightness from % to 100%.

Short press to switch CCT (Warm light-warm and white light-white light); long press for stepless CCT adjustment

Button indicator light description: white when starting up, 100% brightness, 30% brightness when shutting down; land 30% brightness when clicking again. The switch has a power-off memory function.
