

ATTENTION !!!
**DO NOT HANG
WITH CORD
HANG DIRECTLY ONTO
SCREWS IN WALL**

MIRRORS WITH STRAP HANGERS

If the mirror is fitted with 'strap hangers' two screws must be used to hang the mirror, again the same procedure as for corded mirrors.

Two inch (min) steel roundhead screws and washers for brick walls, cavity bolts for plaster board.

Under no circumstances can mirrors fitted with strap hangers be hung using cord. The strap hanger will cut the cord if hung in this way.
