

Installation Steps:

Thank you for using our products. Please read the operating instructions before installation. Please keep this instruction as a reference. Before installing this product, please disconnect the power supply. We recommend a professional electrician to do the installation.

1. Straighten the wire of the lamp head, pass it through the screw hole in the middle of the ceiling plate, then adjust it to the desired length, then tighten the fixing plastic screw from the side.
2. Secure the pegboard in the reserved mounting box.
3. Connect the black wire to the black power cord with the wire cap (provided) and the white wire to the white power cord and wrap it tightly with insulating tape. Connect the ground wire of the fixture to the ground wire of the junction box. If the house does not have a ground wire, connect to the green screw on the wall plate. (Screw label: GND). Carefully tuck all wires into the junction box.
4. Secure the light to the wall plate with the round head nut.
5. Remove the black plastic ring above the lamp head and install the wire mesh cover in the lamp head position, holding it firmly in place with the black plastic ring you just removed.
6. Install the bulb on the lamp head and make sure it makes good contact.

Attention:

1. The input power of the lamp is AC 120V 50Hz.
2. Any behavior that violates residential fire protection regulations is prohibited.
3. Under no circumstances should the lamps be covered with heat insulation pads or wooden materials.
4. Before maintenance, make sure that the power supply of the lamp has been cut off and the light source has cooled down. Before powering on, make sure that the light source and the lamp holder are connected correctly.
5. Please wipe with a towel or flannel, and clean the lamp body with a non-corrosive detergent. Do not scrub directly, wipe with water or a damp cloth.
6. If you have any questions about this manual, please consult a qualified lighting installation engineer.
