Lighting installation instructions

Installation steps

1.Use the middle metal rod and accessories to lock the lamp body, lampshade and chain

2.Connect the other end of the chain to the canopy

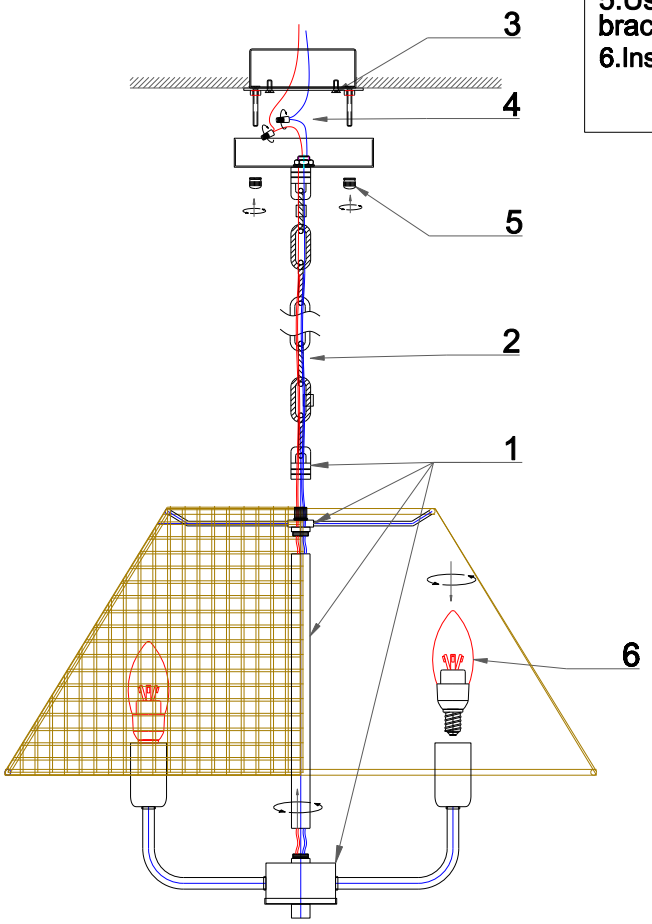

3.Use screws to lock the mounting bracket to the ceiling

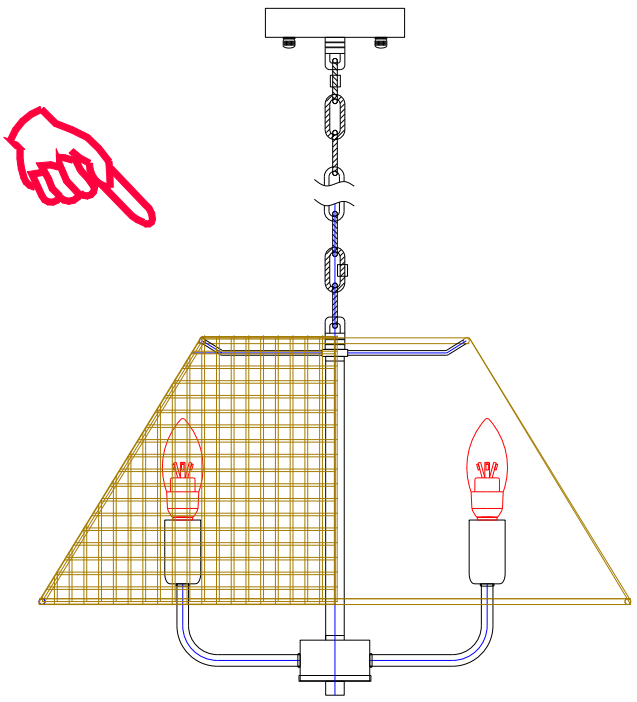

4.Connect the power cord (please disconnect the power supply before installation).

5.Use decorative nuts to lock the canopy to the mounting bracket

6.Install the bulbs (bulbs not included) and turn on the switch

The end!

matters need attention

1.Before installing, cleaning lamps, or replacing bulbs, the power supply should be cut off.
2.Rated voltage 110-130V. Install the bulb into the socket in the lamp base assembly inside the lamp housing (6). The fixture is rated for 5*E12 bulbs (not included), up to 60W per bulb.
3. Wear gloves before installation. Avoid scratching the surface of the lampshade and wires during installation. Please do not collide with the lamp to avoid injury.
4.Never install it on uneven ceilings. Keep flammable items such as paper and cloth away from rattan chandeliers. (avoid fire)
5.The lampshade must not be close to corrosive chemicals and gases containing acid or alkali, and must not come into contact with the lampshade. Can be cleaned directly. You can only try this with a clean, soft cloth.
6. Do not touch the lamp during use or after turning off the light (to avoid burns) the bulb from being damaged.
7.It is recommended not to use it in places with high humidity or high temperature. Recommended for indoor use
8.When using, be careful to handle it with care and minimize the number of movements to prevent damage to the bulb.
