LEIDEN

WALLPAPER

CORAL

W0194/02

Other Colourways

Leiden evokes a folk style in the drawing of these beautiful botanicals, a nod to its namesake, The Hortus botanicus Leiden, the oldest botanical garden in The Netherlands. This is a modern take on an old-world design where the lovely spacing of each flower and plant gives way to a soft ground, with some pastel notes. A mid-scale printed fabric is a coordinate to this wallpaper.
