INSTALLATION OF CAMS AND PINS

Step 1-2: Align the plastic part with the mounting hole and press it in. If you can't press it in, loosen the screw counter clockwise or completely remove the screw from the plastic part and try again.
Step 3-4: After pressing the plastic part into place, use a screwdriver to tighten the screw clockwise.

Screw the pin into the hole. Set the cams correctly by aligning the head of the cams with the lock pins. Lock the cam by turning the cam head with a screwdriver until it is tightened. Please do not use an electric screwdriver to assemble the unit.
