

LANDSCAPE EDGING

CREATE BEAUTIFUL CURB APPEAL AND
LANDSCAPE EDGING IN A SNAP!

AVAILABLE IN
24, 48 & 72 FEET

Pro tips

Use a ½" by 17/5" length auger bit (7/16" hex) attached to a drill to make your holes effortlessly.

ANCHOR STAKE INSTALLATION

- 1 Lay out all your supplies and gather tools needed.
- 2 Beginning at a corner, install your first anchor stake. Then measure and drive your anchor stake into the ground every four ft. (or to the end of your run).
- 3 Attach your posts to the anchor stakes with screws provided.
- 4 Start at your corner and install first two bottom rails using corner rail connectors and rail connectors. Continue attaching rails with rail connectors until runs are complete- using corner rail connectors as needed.
- 5 Next install top rails, starting at your corner and continuing until runs are complete.
- 6 Attach post caps to vertical posts and secure firmly by tapping with a rubber mallet.
- 7 Tap top rails up to meet bottom of post caps with a rubber mallet.
- 8 Screw lattice to rails (8 screws per 4 ft. section recommended).
- 9 Screw in rail connectors.

LE24AS 16" x 24'

Description	QTY
Vertical Posts 15.33"	7
Vertical Post Caps	7
Rails 46"	12
Anchor Stakes	7
Corner Rail Connectors	8
Rail Connectors	24
Screws (50) CT.	3
