Depths of Indigo 1

D2775S55495-4727

Depths of Indigo 1 is a fascinating study of juxtaposition using a hyper-
abstraction style. The work on canvas plays in dualities of composition. Two
contrasting scenes present a tranquil motif in the upper portion of the
picture plane offset by a turbulent vista in the lower. A strong implied line
separating the two views offers a bit of balance. Variations are made more
pronounced by a nearly solid color field on top set off by multiple tonalities
below. The insertion of uncanny elements – a mysterious illuminated blob, a
shock of bright yellow, seemingly atmospheric elements – lends a celestial
feel to the composition. A mostly blue color palette in midnight blue with
streaks of turquoise and illuminating white creates a sense of ethereal depth,
drawing the viewer into a contemplative journey in space. An engaging
addition to ART by TA, Depths of Indigo 1 is a masterful study of color, light,
and technique.
