

Step 1. Installation sequence overview.

Step 2. Connecting plate & Pedestal: Align the connecting plate with the holes of the chassis and tighten the screws.

Step 3: Tabletop & Pedestal: 2 people place the desktop on the installed pedestal. Then we need to squat down and tighten the screws.

Step 4. Assembly completed.

Tips:

① Do not lock each screw at first. After the last screw is screwed to the connecting plate, the four untightened screws can finally be locked together.

② If the light at the bottom of the table is dark, it is recommended to use a flashlight to quickly see the hole location.
