## The Portobello Table Lamp

### ASSEMBLY

1. This lamp comes fully assembled. Review reverse side of this page for important warnings and safety information prior to use, and below for instructions on how to charge and operate.

### OPERATION & USE

**CHARGING :** Before using the lamp, it should be plugged in to a 110v-powered outlet using the provided USB-C charging cable. Flip over the lamp to see an indicator light, which will glow **red** while charging, and **green** when the charge has been completed. A full charge will take approximately 5 hours.

**POWER & DIMMING :** To turn the lamp on, tap the power button. Continue tapping to rotate through the 3 brightness levels and finally to turn Off. Once fully charged, the lamp can light up to 8 hours on the dimmest setting, and up to 4 hours on the highest setting.

The lamp may be used while plugged in and charging, if desired.

# BRIGHTECH

## SAFETY & WARNINGS

This product is intended for 110v voltage only, when using the supplied adapter cable. Use with a higher voltage is likely to cause damage to the product as well as the electrical component it is being powered by.

Do not bring this product or any of its components in contact with any water or extreme heat.

Keep between 23 degrees F & 104 degrees F, and below a humidity of 95%.

Do not use this product outside of its intended and advertised use. Do not tamper with internal parts or wiring.

Do not operate if the lamp has been physically damaged in any way.

Brightech is not responsible for any failures associated with modifications to this product or any of its electrical components, or when the product is used with externally purchased parts not manufactured to come with this product.

## FURTHER RESOURCES | Diagnosis

Though all of our products pass rigorous pre-production quality control, we understand that sometimes things can happen. If your product is experiencing any abnormalities, please see below for some more insight as to what may be happening & if there's anything you can do to troubleshoot. If the purchase is covered under warranty, notify us of any weaknesses or malfunctions as soon as they are discovered.

**Note: Never make any temporary or permanent alterations to any parts or components of this product.**

■ Light Flashing or Strobging: A malfunction of this sort may suggest a problem with the power adapter cord, necessitating a replacement of this cord.

■ Light Dim or Dead: If the LEDs have dimmed, or the lamp has failed after first not performing at max brightness, this may suggest a failure of the actual LED component, meaning the lamp will need to be replaced.

## SPECIFICATIONS

Wattage | 4.5 watts

Color Temperature | 3000 kelvin

Bulb Brightness | 90-400 lumens

Voltage | 5.5v

Adapter | Input AC100-240v AC 50/60HZ

Output 5V-2A
