1-Search and download "Tuya Smart" in the App Store, Google play or scan QR.
2- Install and open the app.
3.1 Open your App account.
3.2 Create a new account:
→ input your mobile number or email address.
→ click to get the verification code (check your mail box).
→ input the verification code.
→ set login password.
→ accept the permissions.
→ you have your account created.
4- Turn on Bluetooth and WiFi , connect WiFi (Note: WiFi can only use 2.4G router)
5- **Link the ceiling fan:** Open App,then turn on the power supply of the fan controller and press and hold the "6h" button of the remote control handle for about 5 seconds within 10 seconds after the fan is powered on. At this time, click Add device in the App main interface, the light will flash and the connection icon of the fan will appear on the App interface.
Next click "Add device" button.Then you can enter the mobile phone control interface to control the fan (Note: When Bluetooth matching, the fan motor cannot be in working state).

NOTES
1. Please check whether the WIFI account and password information are correct.
2. Reducing the distance between mobile phone, router and an receiver can connect more faster, otherwise it may cause connection failure.
