

# Ladder Assembly Instructions

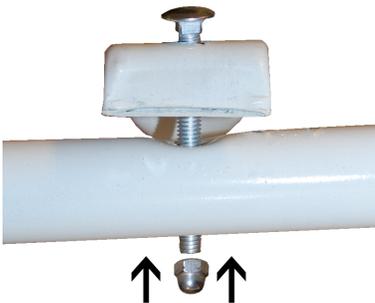

## Step 1-

Insert one of the J-shaped side bars into each side of the U-shaped brace, making sure that the lock pins pop into place.

## Step 2-

Lay the steps along the side bars so that the holes align and bolt them in place. **Be sure that the bolt locks in place.**

## Step 3-

Lift the frame pad on your trampoline and slide the curved ends of the ladder side bars underneath so that they hook onto the frame. If necessary, reposition the frame pad to cover the frame and top of ladder.

### WARNING

1. Ladder lets young children climb onto trampoline.
2. Trampolines not for children under 6 years.
3. Do not use ladder if children under six might be nearby.
4. Remove when trampoline is not in use.

Inspect before each use and check bolts for tightness. Discontinue use if any unsafe conditions exist.

**WARNING:** Do not use the ladder if the bottom U-brace does not touch the ground when the ladder is installed.
