

Model B - Standard Equipment List

Model B - Installation Procedure

1 Attach the pipe to the flower basket

2 Fix it and then connect it to the bottom of the water pump

3 Fit the fixed components into the top of the pump

4 Connect the air inlet hose to the water pump inlet

5 Place the filter cotton

6 Connect the shower pipe and connecting hose

7 Install the outlet duck mouth device

8 Insert the assembled water pump into the slot under the filtration tank, connect the flexible hose to the water outlet on the top of the pump

9 Open the rear cover of the fish tank and install the filtration tank.

10 Open the front cover of the fish tank, and fix the LED light.

11 Installation completed. Start filling with water.

12 After filling with water, the water level should be higher than the pump to prevent the pump from overheating and getting damaged
