

HOW TO MEASURE FOR THE RIGHT FIT

Step 1: Measure Your Furniture

1

Height

Measure the height of the backrest from the seat up to the top edge.

2

Depth

Measure the depth of the seat from the front edge to the backrest.

3

Width

Measure the width of your chair between the inside edges of each arm.

Step 2: Compare to Cushion Sizes

Match your furniture measurements to the cushion dimensions.

If your measurements fall between sizes, round up or down to the nearest 1/4 inch for the best fit.
