Note: 1. While holding down the A key, lift it slightly, then press it down to make the No. 2 board extend and retract

The ways to adjust the door

- Before adjusting the hinge, please check whether the cabinet is skewed.
- If the skew can not be repaired, please remove the anti-tipping device first, then adjust the cabinet to vertical position.
- Please adjust the hinge with the door open.
- Please operate it with more than 2 people. one Person holds the door and the other one adjusts the screw.

Components Name

Obvious gaps between doors or Doors don't look closed

- 1 Turn "internal & external screw" to the right can make the door approach inside. Please adjust the doors little by little.

If the 2 doors are overlap, please turn the "internal & external screw" to the left.

When door is crooked

Please take the following steps to adjust first.

- 1 Rotate the "front and rear screws" to the left

After adjusting the "front and rear screw". the door still does not change please turn the "internal & external screw" to the right slightly.

- 2 Push the door to the cabinet

- 1 Rotate the "front and rear screws" to the right

When door is leaning

- 1 Turn "internal & external screw" to the left can make the top of the door tilted outward.

Protruding to underside

- 1 Turn "internal & external screw" to the left can make the top of the door tilted outward.

When the door is higher on top

- 1 Turn "up & down screw" to the left

- 2 Lower the door's height so that 2 doors are of the same height.

- 3 Turn "up & down screw" to the right

If the door is lower on bottom, please lift up the left door slightly on step 2
