

## Hanging Instructions

This is a horizontal sculpture. Hanging it is as simple as hanging any piece of framed art. We usually recommend getting two persons for hanging (much easier but it can be done alone as well). First please make sure your hanging rings on the back of the piece are clear of any shipping wires and clips that may be leftover from the shipping mounts. These may be discarded.

Next, one person holds the sculpture in place while another person eyes the correct position of how and where you would like it hung. While holding in place take a long pencil and mark the location of the two uppermost hanging rings. (**Note:** the lower hanging rings are simply standoffs from the wall that help give the sculpture its three-dimensional look).

Take the pc back down from the wall, install two OOKs style or comparable picture hangers 30# size or greater (seen left) These are not provided as each surface you want to mount it on may be best suited by different anchors. Then mount the piece by placing the hanging rings on to the newly installed picture hangers, and that's it!

Congratulations on your new art installation!
