Wall Mounting

Ground Mounting

Ceiling Mounting

- You need to find a suitable outdoor waterproof power outlet that plugs in and works.
- This product can be installed on walls or wedged into the ground, without switches or faults, making it easy for anyone to install and use.

Specifications

Luminous power Voltage	30W
Input Voltage	AC120V 60Hz
Cable Length	9.8ft (3m)
Waterproof Rating	IP66
Feature	Dusk to Dawn Sensor, Outdoor use only, Plug and play

- Dusk to Dawn Mode: with a photocell sensor, led flood light outdoor will automatically turn on at dusk (Under 45-55LUX) and stay off during the daytime (Over 55LUX) .
Note: Do not block the floodlight or install it in complete darkness for a long time, it will affect the operation of dusk to dawn sensor.
- IP66 Rating ensures the dusk till dawn lights work well even in bad weather such as rain and snow, and can be applied in barns, gardens, squares, factories docks, and stadiums.
Note: Long term use of floodlights outdoor may cause water mist on the panel, which does not affect normal operation.
- The LED outdoor flood light is designed with a fin-type heat sink, which makes it increases the air contact area and efficiently speeds up heat dissipation.
Note: The working temperature of the floodlight housing is controlled at 35-40 ℃ . Please do not touch it with your hands to avoid burns!

- Due to 3m/9.8ft cord with plug design and 180° adjustable bracket, you can install the plug in flood light on wall, ceiling or ground.
Note: If you feel that the configured cable is not long enough or that multiple floodlights need to be installed at the same time, please use a power cord extension cable and a splitter (not included) to meet your installation needs.
