

#### THANK YOU FOR YOUR PURCHASE

Thank you for purchasing this quality product. To ensure correct function and safety, please read and save all instructions before using the product

### SAFETY TIP

1. Installation work and electrical wiring must be done by qualified person(s) in accordance with all applicable codes and standards (ANSI/NFPA 70), including fire-rated construction.
2. Read all instructions and safety information carefully before installing your fan and save these instructions.
3. To avoid possible electric shock, turn off the electricity at the main fuse box or circuit panel before you begin the fan installation or before servicing the fan or installing accessories.
4. Make sure you have a location selected for your fan that allow clear space for the blades to rotate, and at least seven (7) feet of clearance between the floor and the fan blade tips. The fan should be mounted at least thirty (30) inches from walls or other upright structures.
5. **WARNING:** The outlet box and ceiling support joist used must be securely mounted, and capable of supporting at least 100 pounds. To reduce the risk of fire, electric shock or personal injury, mount to the outlet box marked acceptable for fan supported and use mounting screws provided with the outlet box. The box must be supported directly by the building structure.
6. **WARNING:** To reduce the risk of fire, electric shock or personal injury, mount to outlet box marked "acceptable for fan support" and use mounting screws provided with the outlet box most outlet boxes commonly used for the support of lighting fixtures are not acceptable for fan support and may need to be replaced. Consult a qualified electrician if in doubt.
7. Electrical diagrams are for reference only. Light kits that are not packed with the fan must be UL listed and marked suitable for use with the model fan you are installing. Switches must be UL general use switches. Refer to the instructions packaged with the light kits and switches for proper assembly.
8. After installation is complete, check that all connections are absolutely secure.
9. After making electrical connections, spliced conductors should be turned upward and pushed carefully up into outlet box. The wires should be spread apart with the grounded conductor and the equipment-grounding conductor on one side of the outlet box.
10. **WARNING:** To reduce the risk of electrical shock and fire, do not use this fan with any solid-state fan speed control device, or rheostat.
11. Do not separate the reverse switch until the fan has come to a complete stop.
12. Do not insert anything into the fan blades while they are rotating.
13. **WARNING:** To reduce the risk of personal injury, do not bend the blade brackets (also referred to as "flanges") during assembly or after installation. Do not insert objects in the path of the blades.
14. To avoid personal injury or damage to the fan and other items, be cautious when working around the fan or cleaning the fan.
15. Do not use water or detergent when cleaning the fan or fan blades. Dry dust cloth or lightly dampened cloth will be suitable for most cleaning.

**NOTE:** The important safety precautions and instructions appearing in the manual are not meant to cover all possible conditions and situations that may occur. It must be understood that common sense and caution are necessary factors in the installation and operation of this fan.

**NOTE:** This product is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities are different or are impaired, or lack of experience or knowledge, unless such persons are supervised or trained to operate the appliance by a person responsible for their safety.

**NOTE:** Children should be supervised to ensure that they do not use appliances as a toy.

## Packing List

Wall bracket

Bracket connecting nut

Lamp bracket

Lamp bracket fixing nut

Lamp body

Remote & Remote holder

### NOTE:

Remote control requires AAA 1.5V battery x 2pcs (not included)

## Installation Step

1. Secure the wall bracket to the wall using expansion screws.

2. Secure the lamp bracket to the lamp body using the lamp bracket fixing nut. Adjust the angle to the desired position before tightening the lamp bracket fixing nut firmly.

3. Connect the wall bracket and lamp bracket using the bracket connecting nut. Adjust the lamp to the desired angle, securely fasten the bracket connecting nut, and insert the R-pin to prevent the nut from loosening.

## Remote Control Instructions

### NOTE:

Please insert 2 batteries before using.  
AAA 1.5V battery x 2pcs (not included)

- ① Turn on/off the light.
- ② Quick switch of the light color: Yellow Light→White Light→Natural Light
- ③⑫ Adjust the light color temperature.
- ④**SETUP: remote signal pairing.**If the remote control loses signal of the fan, press and hold this button at the very beginning after it's powered on from wall switch. After the fan flashes or beeps, it's paired successfully.
- ⑤⑪ Adjust the brightness of the light.
- ⑥ Fan moves forwards or reversely.
- ⑦⑧⑬ Fan speed.
- ⑨ Turn off fan including the light.
- ⑩ Night mode, lights will be dimmed when press this button.
- ⑬ Timing for 2 hours for the fan.
- ⑭ Natural wind of the fan, fan speed will change automatically when use this function.
- ⑮ Turn off the fan.
