

INSTRUCTION

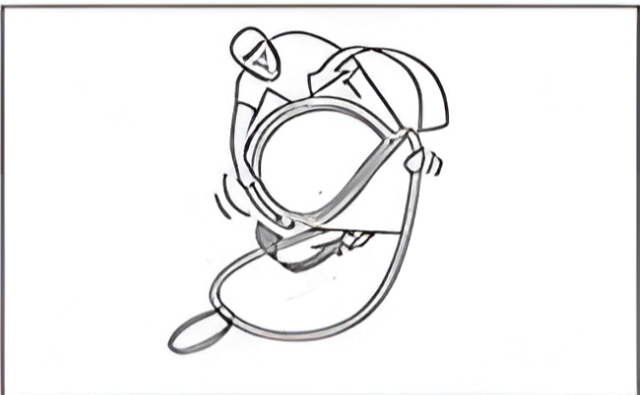

1. Grab the four sides of the tent and put them together

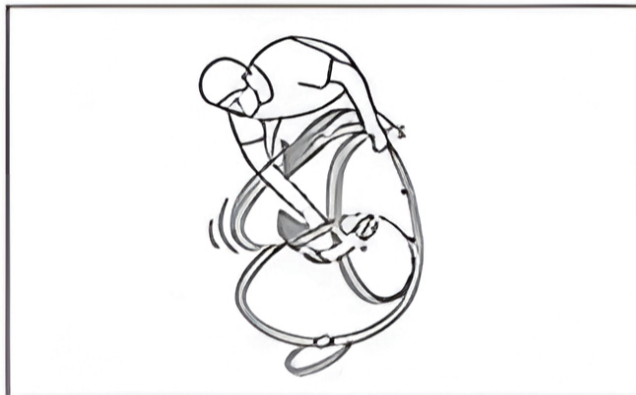

2. Overlap the folded parts together

3. Pick up the folded part with one hand, and stand it up, the side with the stretch belt facing down

4. Press the upper part down

5. Press the top down hard, please be careful not to use too much force, which will cause the pole to break

6. After pressing the top of the tent down to the ground, at this time one side of the pole is bent inward by hand to form a small circle

7. Arrange the two circles, please press out the excess air in the tent

8. Fix the tent with the stretch strap and put it in the storage bag
