

## Outdoor Post Lantern User Manual

### Product Assembly

### Installation Instructions

1. Place the base on top of the post and position as required.
2. Use an electric drill to make 4 holes in the desired surface, place the provided set screws into holes, place the base in line with the holes, and screw mounting screws.
3. Pull the power supply wires out from the post and the fixture wires out from the fixture body, to allow connection of Black, White and ground lead to appropriate supply leads, using approved wire connectors.
4. Secure the fixture body to the post using the wood screws provided.
5. Install a light bulb. The bulb must not exceed wattage specified on the fixture label (100W Max.).
6. Using the lock screw screwing the top cover fixture body.
7. Turn on the power.
