Then connect the bottom shelf to the support frame with a wooden pin

A top-down view of a person's hands and feet as they assemble a piece of furniture on a light-colored floor. The person is wearing grey jeans and black and white sneakers. They are holding a brown wooden L-shaped bracket. On the floor next to them are four black casters, a row of ten brass-colored screws, a single wooden pin, a small metal wrench, and a small metal pin. A white, irregularly shaped object, possibly a piece of tape or a small container, is also on the floor.

Then connect the bottom shelf to the support frame with a wooden pin

**Secure the first hole with long screws
and the other holes with short screws**

The other leg is installed the same way

Then connect the upper and lower parts

Secure the alignment holes with short screws

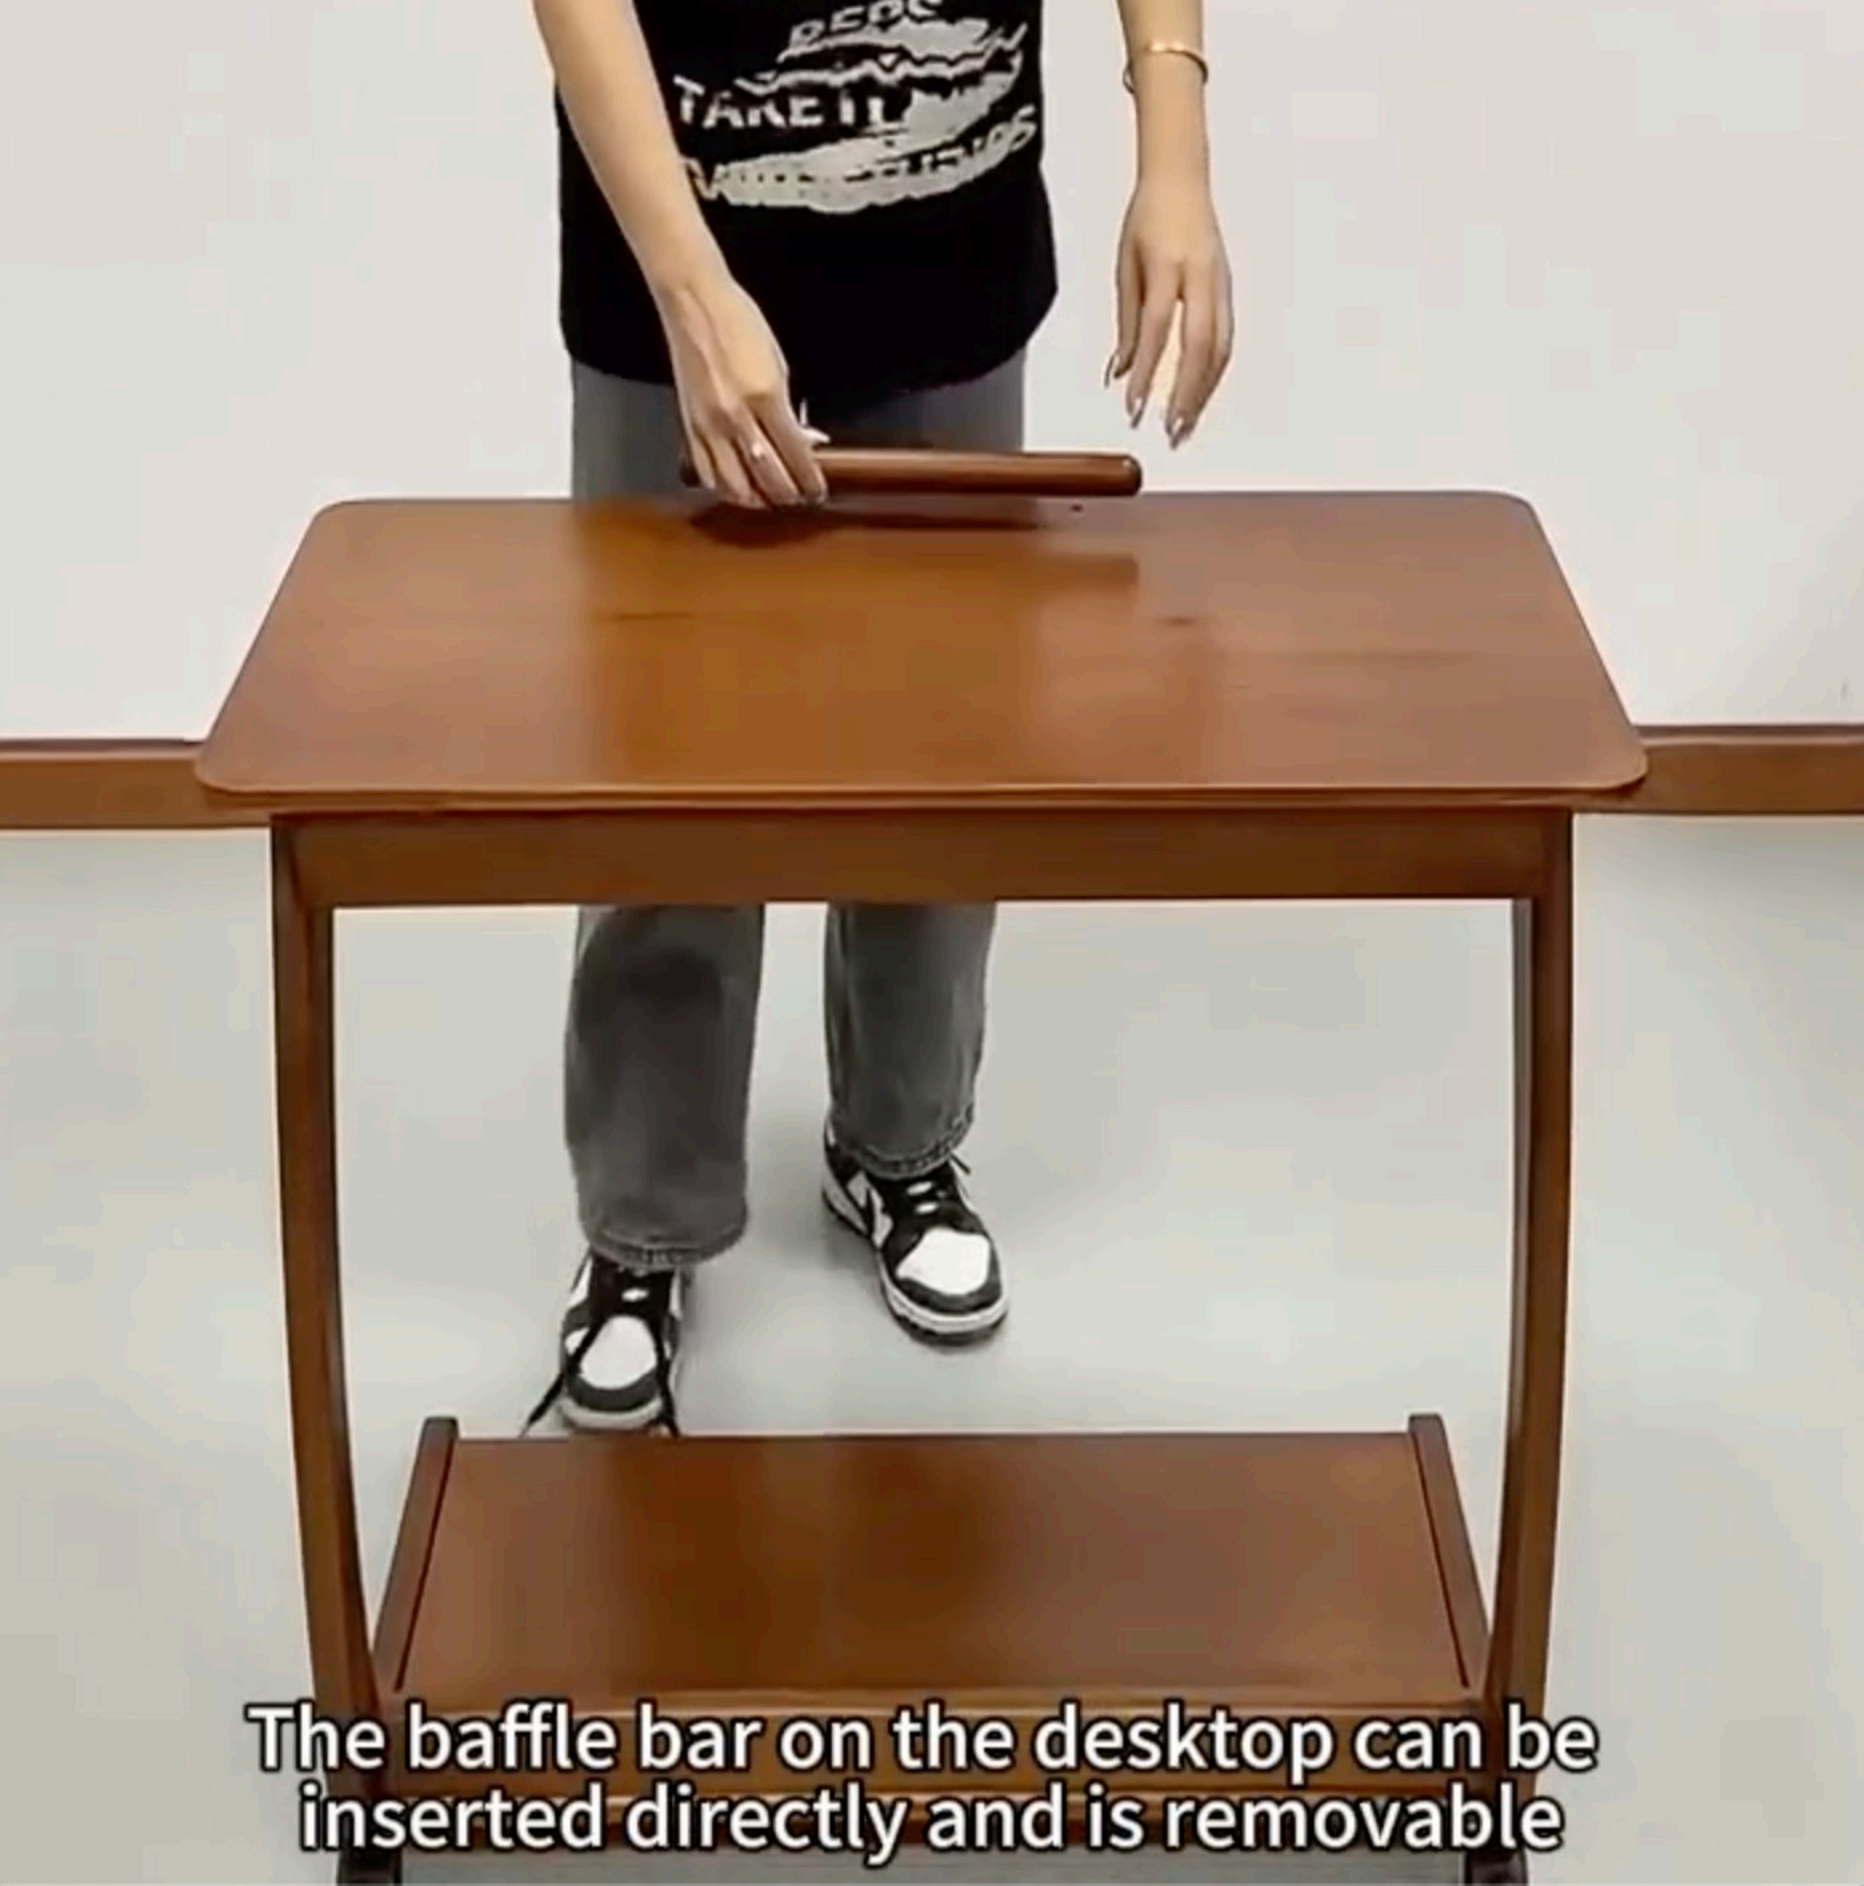

Secure the alignment holes with short screws

Install the universal wheel and tighten it directly

The baffle bar on the desktop can be inserted directly and is removable
