

User Manual

Holly C

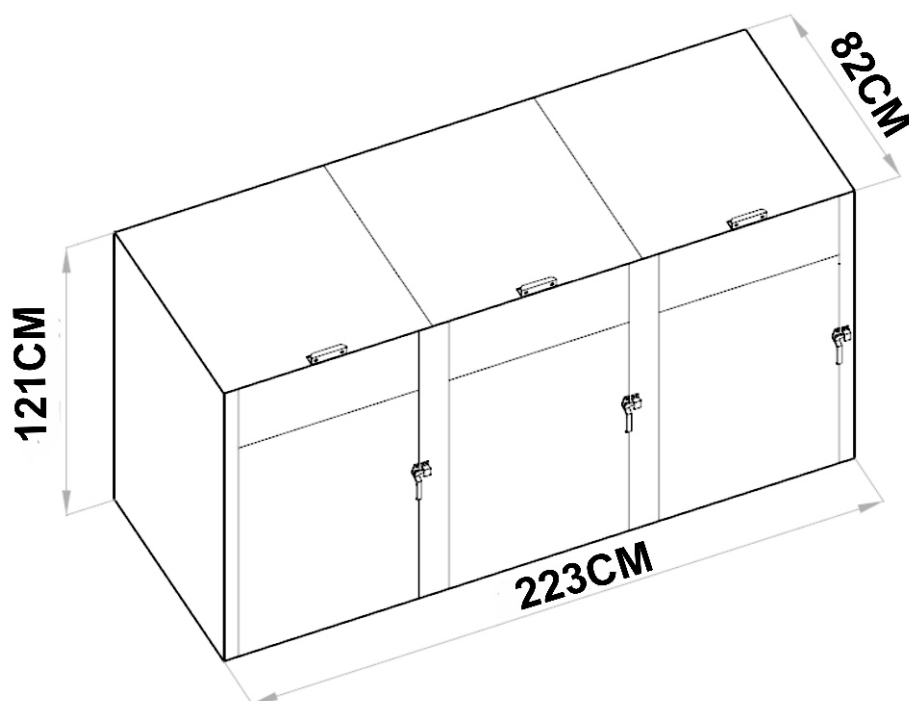

IMPORTANCE

- Please read the safety instructions carefully before use.
- To assemble the kit, you will need 2 adults and a set of tools.

Size:

Installation requirement area:

I. Brief introduction

To ensure safe and correct use of the product, please read the entire manual before installing the product and keep it and the packaging safe as they contain important information.

II. Parts and Instructions

- 1 Garage

III. Parameter setting

- Model -Holly C
- Size -219x82x121cm
- Area - 1.80m²

IV. Package content:

- 1) Garage - 1
- 2) Specification - 1

Importance

Please check the product for damage before use, the damaged product can be traced back to the time of purchase, if there is damage and manufacturing defects can be repaired or replaced with a new product. Products should be kept out of reach of children. Taking into account environmental concerns, product packaging should be discarded in appropriate separate waste collection containers.

V. Safe use policy

Please read the user manual before use.
The product is intended for outdoor use.
Check that the parameters are consistent with those given in the instructions, packaging, or product label.
Do not use near open flame, high temperature, high humidity and flammable materials.
Children cannot be installed.
Do not install the product in a place where it is easily damaged.

Safety

Please read the attached user manual and follow the assembly steps to assemble the product correctly before starting assembly. Check no missing parts before assembly. We need to ensure that a suitable, flat and stable surface is selected for assembly to prevent tipping or damage to the product. Do not install under a tree, as this will increase the risk of falling branches and leaves. Do not choose to start the assembly under extreme weather conditions (strong winds, rain, snow), which will be difficult and dangerous to install. Use ladders safely and make sure they are firmly on the ground. We wear protective gloves to avoid injury when handling tools and heavy components, which require two people to lift together.

We have to be very careful during assembly, and the edges of some parts may be very sharp, so it is necessary that we always wear work gloves, long-sleeved clothing and safety goggles. We should ensure that the base is evenly fixed to the ground, it can be a 10 cm thick concrete foundation, or use a larger concrete slab, the concrete is guaranteed to set for at least 48 hours. An unsecured base may cause damage during strong winds and void the warranty.

Please remove the protective film before we begin assembly. Please read this information carefully for important tips and keep it safe for future reference.

VI. Maintenance and storage

To clean the product, use an advertising wipe. For long-term maintenance, unscrew the product and use a waterproofing agent for the appropriate elements. Store the product in its original packaging in a dry place, away from heat and out of reach of children. Remove snow from the roof every time. More than 10 cm of snow can be dangerous! Don't walk on the roof, you might fall!

VII. Disposing

We should select used products and place them in appropriate containers for recycling relevant materials. The environment should be protected and waste separated in places intended for this purpose.

VIII. Graphic symbol

Packaging Materials - Flat board for recycling provides financial support for the construction and operation of packaging waste recovery and recycling systems.

Please refer to the instructions in the packaging for recyclable packaging materials. Do not throw them around to protect the environment.

Used products should be sorted in appropriate containers.
