NOTE:The tipping restraint hardware included is for wooden stud wall construction. It must be attached to a wall stud. Depending upon your wall construction different anchor hardware maybe required. Please contact your local hardware store for assistance. Young children can be seriously injured by tipping furniture. You must install the tipping restraint hardware with the unit to prevent the unit from tipping, causing any accidents or damage. The tipping restraints are intended only as a deterrent and are not a substitute for proper adult supervision. The tipping restraints are not earthquake restraints. If you wish to add the extra security of earthquake restraints, they must be purchased and installed separately.

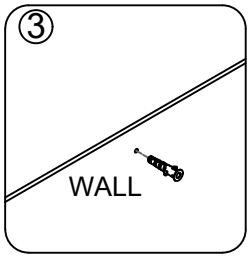

Install the tipping restraint hard ware

1.make mark on the wall

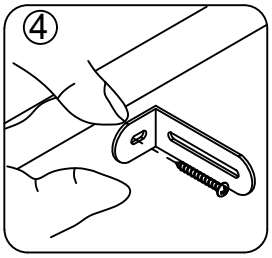

2.drill two Ø6 holes on the wall

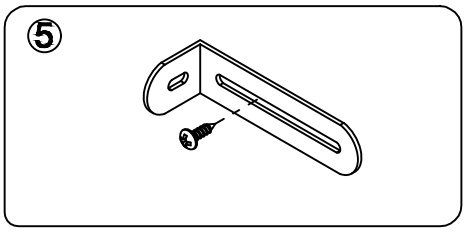

3.put two anchors in the holes

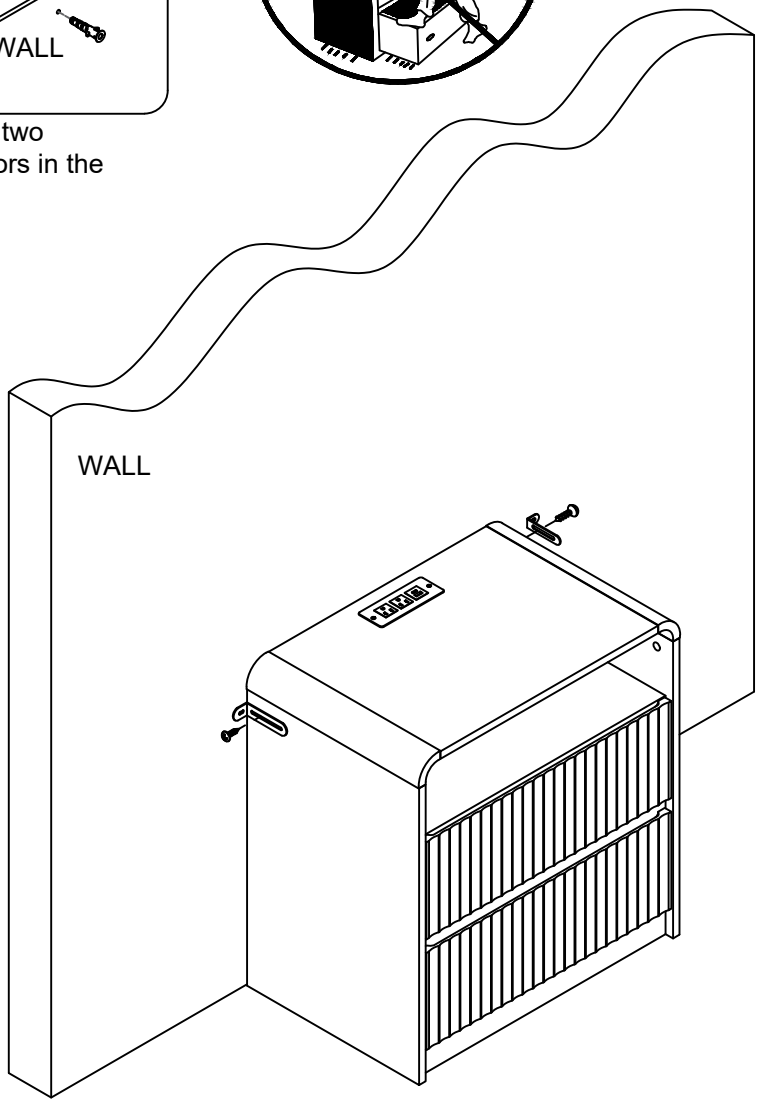

4.fix the device on the wall by the long screws

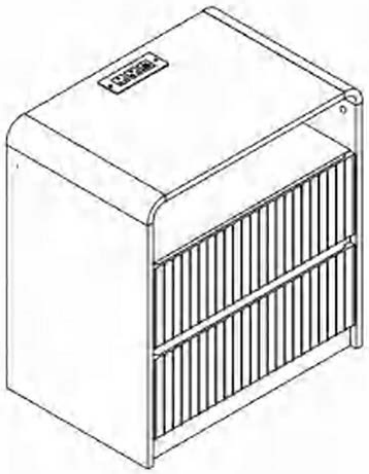

5.Push the cabinet closer to the wall so that the two bases are close to each other and tighten them with screws.
