Installation Method

As shown in the picture, lay the Storage Bucket B down, align the four legs C with the bottom holes, tighten the screws one by one, straighten it, and finally put on the bucket lid to complete the installation.

The storage cover plate is made of multi-layer solid wood board. Due to the natural properties of wood, slight warping may occur when there are drastic changes in ambient temperature and humidity. This is a normal physical characteristic of wood and not a product quality defect. We recommend placing the furniture in a well-ventilated, dry area away from direct sunlight to minimize such warping.
