

Thanks for choosing our product, please read this use and care manual before use this unit.

Care and Maintenance

- Before using, wipe up the wicker/rattan with a clean, wet cloth/towel.
- Do not use bleach or other solvents.
- To prolong the product lifetime, avoid extended and lengthy exposure to rain and sunshine. Where possible, place under covers and or patio and or awnings. Cushion covers are made with water-repellent coating, but they can't stand heavy rain or much pouring water/ other liquid staying on it for longtime. So please keep cushions inside for rainy days and quickly dry the cover surface once there drops some water/liquid on it. Also, if possible, the furniture should be stored indoors during the cold, winter months.
- Seat and back cushions are machine washable.
- For cushion covers, we do not recommend for frequent washing, because frequent washing will damage the UV protection coating of the cover. Hand-wash with mild cleanser is firstly recommended in order to protect the coating.
- Cleaning the glass top, should be handled with care to avoid causing damage. And please make sure to use a soft, clean cloth or towel.
