Helpful Hints

1. We recommend two people to assemble the product easier and faster.
2. Please DO NOT tighten the screws deeply during assembling avoiding that metal frame can be bent and plank will crack.
3. We recommend that all screws should not be tightened over during assembling to make it easy to adjust. When it is adjusted to proper station all screws should be tightened.
4. Caution: If using a power drill or power screwdriver for screwing, please be aware of to slow down and stop when screw is tight. Failure to do so may result in stripping the screw.

We have included a set of tipping restraint hardware for this unit. You must install this hardware to prevent accidents or injuries that can result from the unit falling. When properly installed, this restraint can provide protection against the unexpected tipping of the unit due to small tremors, bumps or climbing. We strongly recommend mounting this hardware to a wall stud and your unit.

NOTE: The tipping restraint hardware included is for wooden stud wall construction. It must be attached to a wall stud. Depending upon your wall construction different anchor hardware maybe required. Please contact your local hardware store for assistance. Young children can be seriously injured by tipping furniture. You must install the tipping restraint hardware with the unit to prevent the unit from tipping, causing any accidents or damage. The tipping restraints are intended only as a deterrent and are not a substitute for proper adult supervision. The tipping restraints are not earthquake restraints. If you wish to add the extra security of earthquake restraints, they must be purchased and installed separately.

Install the tipping restraint hardware

make mark on the wall

drill two Ø6 holes on the wall

put two anchors in the holes

fix the device on the wall by the long screws

fix the device on the back of cabinet by short screws
