Handrail installation
hole positions

Installation holes
for the lift controller

1. Install the armrests on both sides with six M1 screws (the armrests shall be installed last)

2. Use four M1 screws to install the lifting controller

Step 2: Install the five-pointed star base

1. Fit the decorative cover over the central column of the five-pointed star base (See Figures 1 and 2).
2. Push the casters firmly into each leg of the five-star base (See Figure 3).
3. After installing the casters, place the gas lift cylinder on top of the central column of the five-star base and press firmly to secure it (See Figure 4).

Step 3: Install the T-bracket

1. Align the T-bracket with the holes on the back of the backrest and fasten with three M2 screws (install washers while tightening the screws).

Step 4: Connect the seat cushion to the assembled five-star base

1. Insert the gas lift cylinder of the assembled five-star base into the lifting controller.

Finally, install the armrests to complete the assembly.
