

# LIGHT KIT INSTALLATION INSTRUCTION

\*\*\*Read Instructions Completely Before Beginning\*\*\*

## WARNING! RISK OF ELECTRIC SHOCK

All electrical connections must be in accordance with local codes, ordinances, or national codes. If you are unfamiliar with methods of installing electrical wiring, secure the services of a qualified electrician.

Before starting installation, disconnect the power by turning off the circuit breaker or removing the fuse at fuse block. Turning power off using fan switch (speed control on/off) is not sufficient to prevent electrical shock.

**NOTE:** The important safeguards and instructions appearing in this manual are not meant to cover all possible conditions and situations that may occur. It must be understood that common sense, caution and care are factors which cannot be built into any product. These factors must be supplied by the person (s) caring for and operating the unit.

1. Remove the detachable switch housing from fan
2. Remove and discard the center plug from switch housing
3. Attach the light kit to the switch housing by feeding the black and white wires through the hole of the switch housing and screw onto the switch housing - add lock washer and nut to secure inside the switch housing
4. Make polarized wire connection for light kit - fan white to light kit white and fan blue to light kit black wires
5. Carefully tuck wires back into the switch housing and attach switch housing with light kit to fan by connecting the color wire connection plugs as illustrated
6. Feed fan pull chain through the pull chain passage on light kit
7. Attach glass by raising against the light kit and turn clockwise to lock in place
