# INSTRUCTIONS FOR LEVELING A POOL TABLE

- Assemble pool table according to the instruction.
- Any type of level would be sufficient to perform this procedure. However, a two-foot level is recommended.
- Before leveling, make sure level is placed on the playing surface, not the rails.
- Level the ends between the corner pockets: Place the level on the playing surface between the two corner pockets and adjust the height using leg levelers attached underneath the leg apposite of which the bubble in the level favors until the bubbles rests in the middle of the level.

- Repeat the step above to the opposite corner pockets.
- Next, level the length of the table. Place the level next to the side pocket and adjust the height to position the bubble in the middle of the level, using the leg leveler beneath the leg opposite of which the bubble in the level favors.
- Repeat the step above to the opposite length of the table.
- Recheck both short ends to ensure bubble is in the middle on the level.
- Depending on the surface the pool table sits, especially deep pile carpeting, the pool table needs to settle for 24 hours. Recheck the level on each side of the table after 24 hours.
