

Instructions

- 1** Attach side rail to the headboard by lining it up with the roll bolts. Support to the headboard should be provided to avoid bending or snapping the fixtures.
- 2** Do the same with the 2nd side rail.
- 3** Attach the footboard to both side rails by hooking it onto the metal clamp via the roll bolts.
- 4** Now tighten up all the roll bolts designated on the headboard and footboard.
- 5** Slot the centre rail to headboard and footboard, and affix the shorter centre support Leg of wood to the centre of the rail to further support the bed. Screws are provided to attach the centre rail.
- 6** Align all the slats between both side rails and screw them in on side rails and centre rail.

Please note the pictures illustrated may not necessarily show your exact model, but reflects the exact way to assemble your bed. For safety and to avoid damage to the bed during construction it is advised that two people are present to construct the bed.
