

Specification

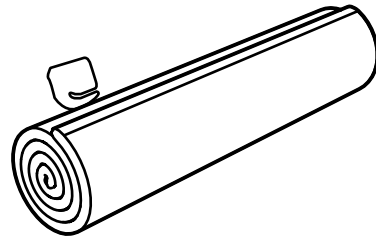

Product name: sofa

Model: SF004

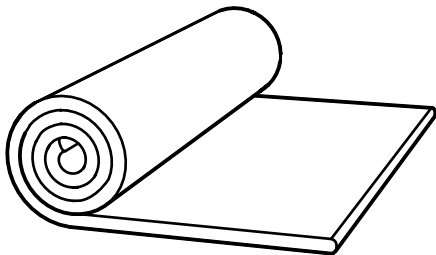

Procedure of use

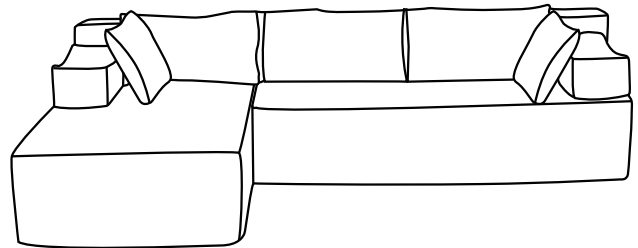

① Open the storage bags

② Open the intima

③ Open product

④ Wait for product recovery

Expand the throw pillow:

1. Use scissors or a razor blade to open the outer packaging.
2. Use the included utility knife to cut an opening approximately 12 cm (5 inches) along the edge of the bag to allow air to enter and expand. Wait one minute, then tear open the vacuum-sealed bag along the dotted line.
3. Allow the product to rest for 72 hours to recover naturally (it will not be strong enough when first opened). Gently tapping the corners of the package will help accelerate expansion.
4. Use a steam iron to smooth out any wrinkles that may have occurred during compression.

Note:

- ⚠ Do not use scissors to tear the inner film, as this may scratch the product. Instead, use the included utility knife. 
- ⚠ Do not expose the unopened compressed packaging to temperatures above 50°C.
- ⚠ There may be a slight odor when the packaging is first opened, which will dissipate after ventilation.
- ⚠ Do not wash the inner core, expose to direct sunlight, or iron. If soiled, wipe with a damp cloth. Only the pillowcase is washable.
