

Modern LED Flower Ceiling Fan With Light Assembly Instructions

Hardware list

Screws

Power strip

Remote control

Screws/nuts/gaskets

Wrench

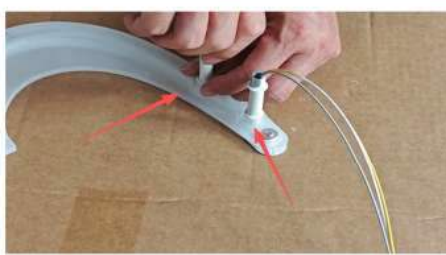

STEP 1

Prepare 8 blades.
Use 2 short hollow screws for each blade; simply rotate them into the holes to secure.

STEP 2

Prepare 4 blades.
Use 2 long hollow screws for each blade; simply rotate them into the holes to secure.

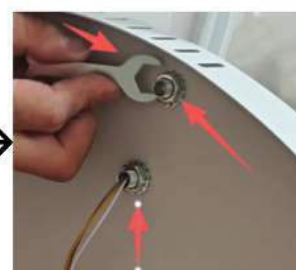

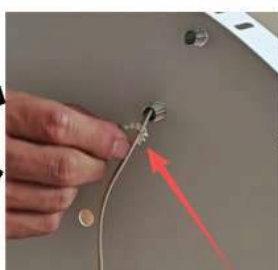

STEP 3

Attach the prepared fan blades to the base.
Note: Use short screws on the outer ring and long screws on the inner ring. Place a washer first, then secure with a nut.

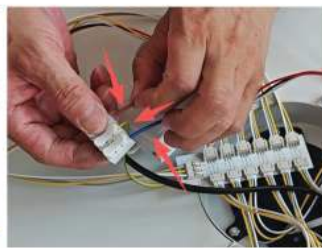

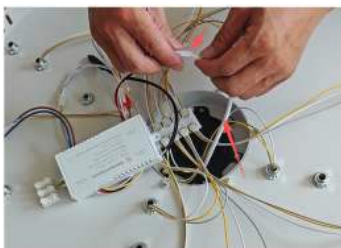

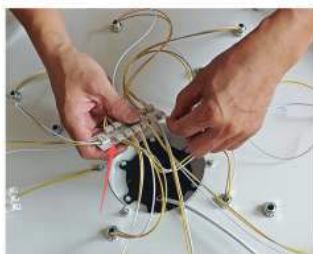

(1) Short
(2) Long

Modern LED Flower Ceiling Fan With Light Assembly Instructions

STEP 4

Plug all power leads into the power strip. Connect L, N, PE to their terminals. Secure the fan blades.

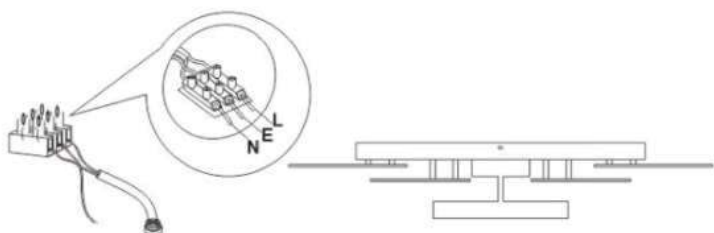

STEP 5

Mount to the ceiling.

Installation precautions:

1. This lamp is suitable for a 110 V power supply.
2. Please do not install it on a damp ceiling.
3. Please cut off the power supply before cleaning.
4. Choose non-corrosive detergent when cleaning.

1. Drill holes in the right places

2. Fix the cross in a good position

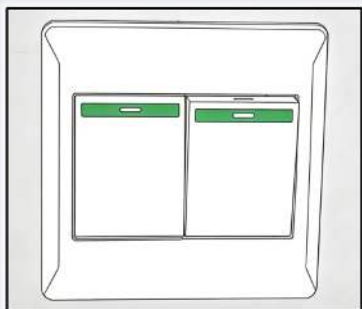

3. Connect the power supply, and align the hole position on the lamp base with the hole position on the cross.

4. Thread the screw through the aligned holes and tighten it.

Steps for Pairing Remote Control

After receiving the remote control, you must pair it with the light to adjust the light color.

Step 1

- Turn on the wall switch.

Step 2

- Press and hold the "CCT Change" button (Keep pressing for 5 seconds).

Step 3

- The light flashes and a beep is heard, indicating that the pairing was successful.
