Water on Neptune 1

D2539S50773-4073

Water on Neptune 1 is a series of three works that feature a tranquil coastal scene. Voluminous clouds lift the gaze upward while the element of contrast is rendered through color and texture. The contrasting color scheme in cotton, dove grey, steel blue, navy blue, and sea green provides a sense of unity. Varied brushstrokes offer a textural feel by juxtaposing a smoothed atmospheric layer against course clouds and rippling waters.

A seemingly endless expanse of sky and water encourages feelings of hope and optimism in this original work of art on canvas. Part of the carefully curated ART by TA Collection.
