Tray Divider 3

INSTALLATION GUIDE

The Dowell Installation Guide serves as a general reference, offering step-by-step guidance for renovation professionals. The tools and fixtures supplied by Dowell for attaching to clients' floors or walls are intended as examples and might not be suitable for all types of surfaces. For optimal results, we recommend engaging a qualified professional to select the appropriate hardware for your specific installation needs. Dowell assumes no responsibility for complications arising from incorrect installation or the improper use of tools, including any subsequent damages.

Installation Instructions : **4007 TD3**

1 IMPORTANT:

Before you begin, make sure you familiarize yourself with all the parts and fully read the instructions.

2 TOOLS:

Screw gun or Phillips screwdriver, and tape measure. NOTE: If screw gun has a clutch, set to lowest setting so as not to over tighten and/or strip screws.

The Dowell Tray Divider is constructed from premium-quality wood. While it can be secured to the bottom of your cabinet for added stability, mounting is not mandatory. If the divider functions securely without attaching the baseboard, simply omit the included screws.

STEP 1

Place the base board flat on the bottom of the cabinet. Position it centrally or according to your preferred layout.

(Optional) Secure the base board using the provided screws: Use a screwdriver to fasten the screws through the designated holes.

(Optional)

STEP 2

Place the back board vertically on top of the base board.

Align the edges of the back board and base board perfectly. Ensure the back board sits flush against the cabinet's rear wall.

STEP 3

Insert the Divider Boards

Angle the first divider board to align with the slots on the base board and back board.

Gently slide the divider downward into the slots until it locks into place.

Ensure the divider is fully seated and vertical.

Repeat the process for the remaining two divider boards.
