

GENERAL APPLICATION OF A LARGE WALL MURAL

01

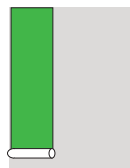

Layout of your mural

Unroll the wallpaper and separate the tiles. Identify each panel and arrange in the hanging order on the floor. Each tile is numbered at the top right.

Important: The standard size of the tile for wall mural is 24" or 36" in width. For custom order tile size may change according to the width and height of the wall mural, maximum width of the wall mural is 52"

02

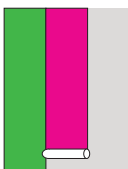

Stick the first panel

Ensure the first panel is stuck straight. This is vital for successful installation of your mural. Please make sure the first tile is stuck carefully and smooth away any bubbles or ripples using a plastic card or squeegee.

IMPORTANT: Do not pull or stretch the material during installation. Work from the top and allow the wallpaper to fall naturally to avoid scratches.

03

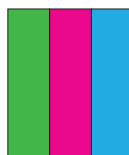

Overlap the wallpaper

When sticking multiple tiles, your mural is printed with 10 ml overlap. Note: textured material vinyl has no overlap. Visually match the image at the joint and smooth out. Adjust the position until the pattern completely matches.

IMPORTANT: Use the plastic card or a squeegee to ensure the product is well bonded at the join.

04

Repeat until finished

Continue the previous stages of each tile until all panels are installed. Trim away any excess wallpaper using straight edge and sharp blade. Sit back and enjoy your hard work.

TOOLS REQUIRED:

Squeegee/
Plastic Card

Leveler/
Scale

Cutter/
Knife

Soft Cloth/
Paper Cloth
