Universal Umbrella Waterbase

Umbrellas

Universal Umbrella Water Base

These high density polyethylene base plates work with any umbrella that uses a conventional flanged cross brace base. Designed to be filled with either water or sand these plates provide the additional weight required to improve umbrella stability in windy conditions (approximately 105 lb water or 130 lb sand per 4-piece set). Completely UV stable with a 3-year warranty, the bases have a chrome plated steel handle for easy carrying and are low profile to fit seamlessly with Coolaroo umbrellas. Their contemporary design makes them an attractive and practical enhancement to any umbrella.
